

COURSE OUTLINE

Division of Business and STEM

NET 239

Connecting Networks

Course Description

This course discusses the WAN technologies and network services required by converged applications in a complex network. The course allows you to understand the selection criteria of network devices and WAN technologies to meet network requirements. You will learn how to configure and troubleshoot network devices and resolve common issues with data link protocols. You will also develop the knowledge and skills needed to implement IPsec and virtual private network (VPN) operations in a complex network. Hands-on exercises reinforce Cisco certification exam objectives.

Text: Reference Division Booklist

Prerequisites: NET130

Credits: 3

Class Hours: 2

Lab

Hours: 2

Food and Drink are Strictly Prohibited in Classrooms as per Health and Safety Laws. Students may not bring in chemicals of any kind without the Appropriate MSD sheets.

Course Coordinator: J. Weichert

Latest Review: SPRING 2019

I. COURSE OBJECTIVES

At the completion of this course, with appropriate study, you will be able to do the following:

- Configure and troubleshoot network devices
- Resolve common issues with data link protocols
- Resolve common issues with OSPF, EIGRP, and STP in both IPv4 and IPv6 networks
- Implement virtual private network (VPN) operations in a complex network

II. PREREQUISITES

The ability to carry out the following configuration tasks: Basic

router configuration.

Basic switch configuration Basic VLAN

configuration

Inter-Switch Link configuration Standard access

list configuration

III. TOPIC OUTLINE

Hierarchical Network Designs 1

Enterprise Network Campus Design (1.1.1) 2

Network Requirements (1.1.1.1) 3

Structured Engineering Principles (1.1.1.2) 4

Hierarchical Network Design (1.1.2) 4

Network Hierarchy (1.1.2.1) 4

The Access Layer (1.1.2.2) 6

The Distribution Layer (1.1.2.3) 7

The Core Layer (1.1.2.4) 9

Two-Tier Collapsed Core Design (1.1.2.5) 10

Cisco Enterprise Architecture (1.2) 10

Modular Design (1.2.1.1) 11

Modules in the Enterprise Architecture (1.2.1.2) 12

Cisco Enterprise Architecture Model (1.2.2) 14

Cisco Enterprise Architecture Model (1.2.2.1) 14

Cisco Enterprise Campus (1.2.2.2) 15

Cisco Enterprise Edge (1.2.2.3) 17

Service Provider Edge (1.2.2.4) 18

Remote Functional Area (1.2.2.5) 21

IV EVALUATION

Final grades are determined through a weighted average of midterm and final examinations,

quizzes, laboratory assignments, homework assignments, class participation, and attendance. Your final grade in the course will be based on the following:

| | |
|---|------------|
| Class attendance, participation, and lab work | 10% |
| Homework assignments | 10% |
| Quizzes/Tests | 20% |
| Project | 10% |
| Midterm examination | 25% |
| Final examination | <u>25%</u> |
| | 100% |

Grades will be assigned in accordance with the following:

| Letter grade | Nominal % | QPA quality points |
|--------------|-----------|--------------------|
| A | 90-100 | 4.0 |
| B | 80-89 | 3.0 |
| C | 70-79 | 2.0 |
| D | 60-69 | 1.0 |
| F | 0-59 | 0.0 |

Attendance Policy:

It is expected that students attend and be on time for all class meetings; attendance is taken at the beginning of every class. 3 lates count as an absence. To accommodate students' reasonable, personal situations that might prevent them from attending classes, each student is entitled to excused absences amounting to the equivalent of one week's class time in a semester. At the instructor's discretion, *students' reasonable, personal situations may permit limited excused absences if proper documentation is provided.* Students with repeated unexcused absences may be subjected to a drop in letter grade or result in withdrawal from the course. Students are responsible for acquiring content that is covered, announcements made, and materials that may have been distributed.

Assignment Policy:

All assignments are expected to be handed in on the due date at the beginning of class. 10% will be deducted each week for assignments turned in late. All late assignments must be turned in two weeks prior before the final exam.

Academic Integrity Statement

Academic integrity is important to student success. Students who submit the work of another student will be penalized. According to the student handbook, "A student who, a) knowingly represents work of others as his/her own; b) uses or obtains unauthorized assistance in the execution of any academic work; or c) gives fraudulent assistance to another student is guilty of cheating. Violators will be penalized."

Classroom Conduct Statement

The college welcomes all students into an environment that creates a sense of community and pride and respect; we are all here to work cooperatively and to learn together.

Students must follow ordinary rules of courtesy during class sessions. Engaging in private conversations, texting, answering a cell phone, sleeping, or other disruptive behavior during class time will not be tolerated.

First Semester Students A coach has been assigned to assist you with navigating your first semester in college. They help with understanding how Mercer works, finding appropriate help with coursework, and establishing academic goals. www.mccc.edu/coaching to find your coach or Contact: Arlene Stinson, LB217, 570-3451, SOAR@mccc.edu

Academic Advising after your first semester Faculty advisors provide help with completing your major after your first semester. Meet your faculty advisors! Contact the division of your major to find out who is your faculty advisor.
