

What is Abnormal?
 Psychological Disorders:
 Basic Concepts and
 Mood Disorders
 Module 32

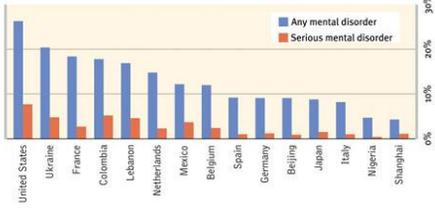

People tend to believe that
 psychological disorders affect a
 small percentage of people, but
 this is not so.

Surveys estimate that during a 1-year period,

 mental disorders, according to reliable,
 established criteria.

Rates of Psychological Disorders
 The prevalence of psychological disorders during the
 previous year is shown below (WHO, 2004).

Country	Any mental disorder (%)	Serious mental disorder (%)

Ukraine	25	8
France	22	5
Colombia	21	7
Lebanon	20	6
Netherlands	18	4
Mexico	17	5
Belgium	16	4
Spain	14	3
Germany	13	3
Beijing	12	3
Japan	11	3
Italy	10	3
Nigeria	8	2
Shanghai	7	2

Sensitivity Please!

The language we use when discussing psychological disorders is very important-people are not just their disorders!

Disclaimer!

PLEASE refrain from diagnosing yourself, your friends, your parents and family, your classmates, your professors or anyone else ☺

How are people with psychological disorders portrayed in our culture?

Labels create stigma!

Words are used to dismiss and dehumanize people who we consider different.

Who decides what's "NORMAL"?

WE do!
The culture and society in which we live determine standards for normal and abnormal behavior

What Is Abnormal Behavior?

Abnormal behavior is characterized as:

A-typical

It interferes with a person's ability to function effectively in the world.

Distressful

To the person who exhibits it or to the people around them

Psychological Disorders

Deviant, distressful, and dysfunctional patterns of thoughts, feelings and actions (Comer, 2004).

Being different (deviant) from most people in one's culture is part of this definition.

- Standards for deviance vary from culture to culture and over time.

Abnormal Psychology

Is the field of psychology concerned with

- "Clinical Psychology"

History

☞ The mentally ill were once subjected to terrible conditions in "insane asylums"

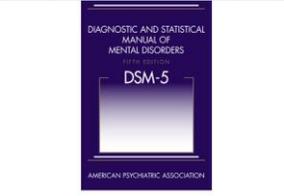

☞ This resulted in

- This effected treatment methods
- Accounts for a large majority of the homeless population.

How are psychological disorders diagnosed?

The DSM 5 (2013) is the most widely used classification system currently used to make a diagnosis.

Why do we need a system to diagnose psychiatric disorders?

Why do some people develop psychological disorder while others do not?

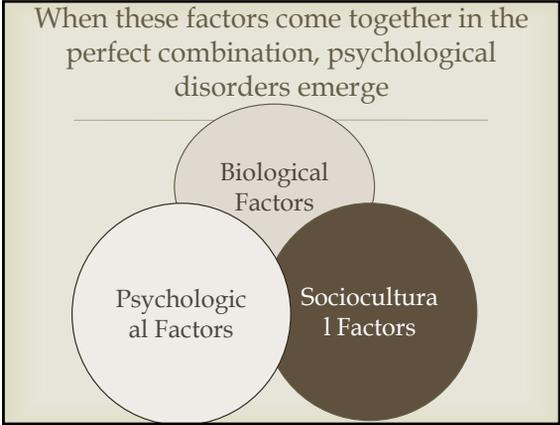

What Causes Abnormal Behavior?

Biological Factors
(genetics, biochemistry, and brain structures)

Psychological Factors
(Personality traits, coping ability, and perception)

Sociocultural Factors
(Experiences throughout life, family dynamics, and your environment)

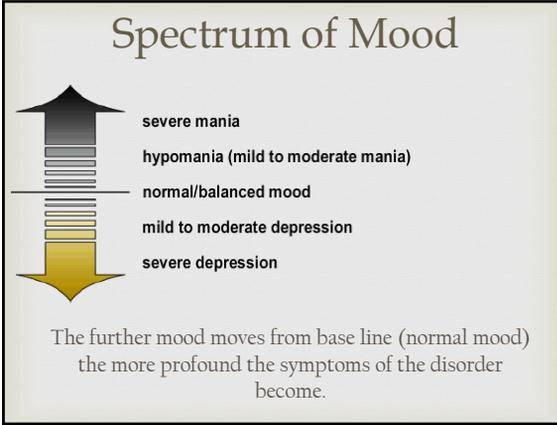

Mood Disorders

Psychological Disorders:
Basic Concepts and Mood Disorders
Module 32

Mood Disorders

☞ Mood disorders are psychological disorders in which there is a primary disturbance of mood:

Have you ever felt depressed? What does depression feel like?

OR

Review the following video clip and evaluate the behaviors of the client

Make note of the various symptoms of Major Depression. Which are cognitive symptoms?
Which are physical symptoms?

Major Depressive Disorder (MDD)

❧

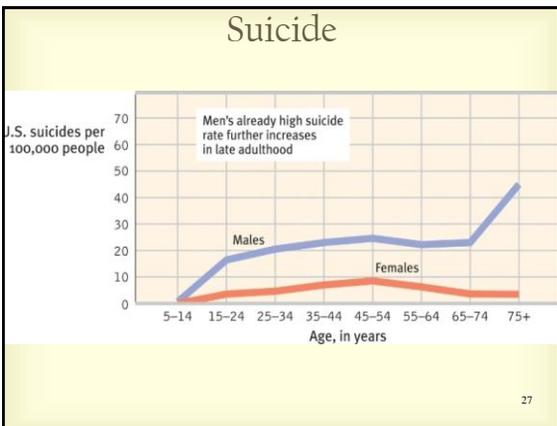

❧ Major Depressive Disorder (MDD) which is characterized by more depressive severe features which lasts for two or more weeks:

- _____
- Feelings of worthlessness
- _____

Research suggests that the incidence of depression and consequent suicide seem to be steadily increasing.

Approximately 1,000,000 people attempt suicide each year in the U.S.

“Suicide is not chosen;
it happens
when pain exceeds
the resources for
coping with pain.”

College students are very at risk
for depression and suicide. If you
or someone you know is battling
with feelings of suicide please
refer them to a professional.
