

Photography and Digital Imaging

Associate in Fine Arts Degree in Visual Arts
Certificate of Proficiency

Program **PHOTO.AFA**
Certificate **PHOTO.CERT**
CIP 500101

The Photography and Digital Imaging program provides for development of skills and creativity in both film-based and digital photography. Topics covered include camera operation, exposure, processing, retouching, manipulation/montage, printing and other forms of media output as well as the use of artificial and natural lighting.

The program incorporates a balance of traditional and digital photographic techniques allowing students to understand technology's role in photography. It encourages aesthetic growth while creating a balance between personal expression and commercial application. Emphasis on experiences in the darkroom, digital laboratory, on location, and in the studio develops both the creative ability and the technical skills essential to photography careers and transfer to four-year institutions.

Courses are offered both day and evening. If the required courses are taken starting in the summer, the certificate can be completed in one year of full-time study. The Associate in Fine Arts degree is a two-year program. Before completion of either program, students are required to develop a portfolio to serve in the pursuit of further education or employment.
