

FLY HIGH!

without ever leaving the ground

Earn a drone operator's Certificate of Achievement and an FAA part 107 Remote Pilot Certification by enrolling in the ABJ Drone Academy @ Mercer.

In as few as 14 credits at Mercer, you can be qualified for a career of the future as a certified drone operator. Get your training at Mercer for one of tomorrow's hottest careers. Be ready to start your own drone services business, or be sought after in such hot drone applications as agriculture, real estate, photography, commercial assessment, and more!

Begin your certification by enrolling in UAS 101 and...

- Learn FAA regulations governing the operation of drones
- Study fundamentals of drone flight and control
- Fly several commercial drone models, including 5 hours of hands-on training
- Select drone payloads for a range of applications
- Collect, assess, and present images, videos, and data
- Prepare for, take, and achieve your FAA part 107 Remote Pilot Certification for drone flight
- Join the growing ABJ network of commercial drone pilots

SPECIAL OFFERS!

Enroll in UAS 101 and receive a free drone!

The first 20 students who enroll in the 7-week UAS 101 course, which begins on October 24, will receive a free fully functional DWI X3 2.4G 4CH Micro WIFI Quadcopter Remote Control Helicopter Mini FPV Drone with a 2MP HD Camera.

Team up and win MORE!

Students who enroll in a group of 3 will receive the incredible FPV-WIFI 2.4G R/C Drone with light and 720P Camera. This mini drone comes ready for VR glasses and design for trajectory flight.

Drone gifts are courtesy of Mercer's business partner, ABJ Drones – see <https://abjdrones.com>.
