

Advising MAT033 Students

"Math Can Wait"

A study of 2,426 MAT033 students has determined that students with a low computation score and a low reading score have a very poor chance of success in MAT033 (25%). It is advisable for these students to postpone enrolling in MAT033 until successful completion of ENG033(Intro. to College Reading I).

Students needing full-time status can be enrolled in any of the courses designated as "companion college courses". A new foundations level computer course, IST033, is available Fall 2006.

"Math Can Wait"

Computation Score		Reading Score
<31	AND	<61

MAT033 - Accelerated

An accelerated version of MAT033 is offered as a 5-week 2-credit option for students who have the following computation, reading and writing placement test scores. This 5 week course can be followed by a 10 week MAT034.

<u>1st Level Remedial Placement</u>	Computation Score	Reading Score	Writing Score
MAT033 only	≥ 46	≥61 No ENG033	≥61 No ENG023
