

**Pricing package for Allied Health Professional Phase Students – Nursing, Radiology, Physical Therapy and Laboratory Technicians.**

The requirements for Radiology, Physical Therapy and Laboratory mimic those of the Nursing Program therefore allowing the pricing to be for all 4 schools of study.

The physical examination including all necessary labs and PPD is a cost of **\$115 without a chest x ray and \$150 with a chest x ray. Should you choose to go with the QuantiFERON TB Gold instead of the PPD skin testing the total would be \$155 without a chest x ray and \$190 with the chest x ray.** Chest x ray would only be needed in the case of a new positive PPD or an individual that has received BCG vaccine and doesn't have a negative chest x ray report dated within the past 12 months.

The following are all possible components of the physical examination process:

Physical examination	Hepatitis B Surface Antibody
Hepatitis B declination form	TB Questionnaire
Urine dip	PPD single or 2 step ( <b>PPD 1 step for continuing students only is \$15</b> )
Rubella/Rubeola/Varicella/Mumps titers	
Chest x ray (Includes the pregnancy test if required)	
QuantiFERON TB Gold lab draw (replaces 2 step PPD)	

**\*\*NOTE\*\*** 10 panel instant drug screen is additional \$35 **if required** for your program curriculum

Immunizations received would be **in addition to the above physical cost** and would be charged, at the reduced rates, as follows:

Hepatitis B immunization	\$45 each (series of 3)
Tetanus diphtheria Pertussis immunization	\$40
MMR booster	\$68
Varicella immunization	\$150 (Includes the pregnancy test if required)
Flu shot	\$20

Once the laboratory and/or radiology results are all received back to our office, the results will be reviewed by the provider that performed the physical examination and a passing or failing decision will be rendered. We will notify your designated individual of these results within 48-72 hours by whatever manner you designate.
