**Catalog description:**

A continuation of Nursing III with emphasis on the patient who requires more permanent modification of life style in order to achieve or maintain optimal health. Students will also continue to develop some basic organization skills to enable them to function as a beginning level practitioner.

**Prerequisites:**

Completion of NUR201 with a grade of “C” or better.

**Required texts/other materials:**

**Textbooks:**

Suggested:

Plus all other textbooks utilized in Nursing I, Nursing II, and Nursing III.

Revised:

June 2010

Reviewed:

January 2010

**Course Coordinator:** Beth Perkins, RN, BSN, MSN, Ed.D (ABD)
MS-119
(609) 570-3386
perkinsb@mccc.edu
Course goals:

Nursing Practice at Level IV is concerned with those at different age levels who require nursing approaches which support the patient through periods of crisis, disability and death based on an integration of nursing knowledge, intervention skills, rehabilitative techniques and understanding of the human needs.

At Level IV, these approaches are:

Hygiene and Comfort Needs
Concerned with those at different age levels who have multi-systems alterations which bring about overwhelming interferences in self care and require comprehensive nursing intervention to meet the hygienic and comfort needs of daily living.

Safety Needs
Concerned with those at different age levels who meet with hazards from crisis situations or diminished senses or perceptions, and require constant protection for a protracted period of time.

Human Sexuality
Concerned with those at different age levels who have irreversible and permanent alteration of sexual patterns due to traumatic or pathological interferences.

Psychosocial Needs
Concerned with those at different age levels who have chronic or irreversible pathological or psychological interferences which require protracted or permanent alteration of life activities.

Activity and Rest
Concerned with those at different age levels who have irreversible traumatic or pathological interferences which require intensive and permanent alteration of life activities.

Oxygen Needs
Concerned with those at different age levels who have continuous interference of the delivery of oxygen to body cells due to acute or chronic multi-systems pathological conditions which require constant management, re-establishment of air exchanges or surgical correction.

Nutritional Needs
Concerned with those at different age levels who require the use of diet as a chief therapeutic measure due to acute or chronic multisystem pathologic and metabolic conditions which affect normal utilization of food, water and minerals.

Elimination Needs
Concerned with those at different age levels who have permanently altered elimination needs due to extensive acute or chronic multisystem pathological interference and require prosthesis, appliances, retraining processes or mechanical assistance.
Course-specific General Education goals and objectives.

In this nursing course, emphasis will be placed on developing knowledge of pathophysiological and psychological interferences to fulfill basic human needs. The effects of these interferences are irreversible, may involve permanent disabilities, multi-systems failure or lead to death. The student will develop nursing approaches utilized in meeting the basic human needs during periods of interference or impairment directed toward maintenance of optimal body function, prevention of potential problems and restoration of health through therapeutic nursing intervention and rehabilitative techniques. At the conclusion of NUR 202, the student should be able to implement these objectives with individuals of different age levels and their family constellation.*

The student will:
1. Develop awareness of responsibility for professional development, ongoing learning, and increasing competence through continuing education and participation in professional organizations.

2. Provide safe physical and psychological nursing care along with patient advocacy to multiple patients with multi-system problems within the parameters of the Nurse Practice Act, the Nursing Code of Ethics and nursing standards in all nursing care situations.

3. Identify interferences to patient’s basic needs presented by complex multi-systems, pathophysiological problems or complex, chronic or acute individual or family psychological problems.

4. Consider current legal, socioeconomic and political forces on health care and patient/community needs when providing care to multiple patients in a variety of healthcare settings.

5. Assess data from multiple patients in a systematic way in a variety of healthcare settings to determine multi-system problems establishing priorities among these problems in order to meet patient outcomes.

6. Perform a developmental and sociocultural economic assessment of healthy patients, acute and chronically ill assigned patients in multiple healthcare settings utilizing concepts based on Maslow, Erikson, Freud and Piaget.

7. Correlate pathophysiological concepts with nursing actions and patient data to develop an individualized nursing plan of care specific for groups of patients, revising that plan based on the patient’s response to care and achievement of patient outcomes.

8. Utilize principles of effective therapeutic communication when providing care to groups of patients from different sociocultural backgrounds with multisystem physiologic problems and complex, chronic or acute individual or family psychological problems.

9. Provide needed information or instruction to patients or groups of patients in a variety of healthcare settings, utilizing a developmental approach based on identified health care needs.

10. Develop organizational skills to implement nursing care plans independently according to established priorities for multiple patients in a coordinated manner within an appropriate timeframe.
11. Create caring activities which assist the patient/significant others in dealing with the stress of multisystems failure and end of life issues in various health care settings.

12. Be able to work cooperatively and collaboratively with health team members, including the student team, to effectively implement patient care in a cost effective manner.

13. Be able to use clinical judgment when delegating nursing care to assistive personnel.

14. Utilize critical thinking skills in a variety of clinical settings when providing care to multiple patients.

*Family Constellation refers to ethnic, religious, cultural and socioeconomic aspects of the patient and his/her significant others.

**Classroom Lecture:**
Lectures are based on learning objectives from the course syllabus. **Students are expected to have completed assigned readings prior to lecture.** Lectures will be interactive with application of learning as the major focus. A variety of methods will be used: small group work, case studies, lecture and discussion, use of test questions, games. Lectures will be conceptually based and available on the web. No lectures will be handed out in class. Lectures cannot be downloaded and printed in lab.

**Clinical Laboratory:**
Each student will have clinical experience in 3 areas:

1. Medical Surgical Unit with a focus on management of multiple patient assignments caring for patients who have multi-system involvement.
2. Pediatrics with emphasis on children with handicaps or complex problems
3. Psychiatry with focus on care of patient in a private psychiatric hospital setting.

**Preparation** for clinical laboratory will focus upon clinical objectives. The student is expected to download all the directions and objectives from the website for the clinical experiences at www.mccc.edu/~martinl

**Oral presentations in Clinical Laboratory:**

1. **An Oral Case Study** will be presented during the six week Medical Surgical rotation (see Nursing 202 Case Study Guide). This is a pass/fail grade.
2. **An Oral Nursing Care plan** is expected in Psychiatry (see Nursing 202 Psychiatric Nursing Care Plan Guide).
3. **An Oral Teaching Plan** is expected in Pediatrics. This is a pass/fail grade, (see Nursing 202 Pediatric Teaching Plan Guide). Done in pediatric clinical experience.

**College Laboratory:**
Students are expected to attend all scheduled college laboratories. Objectives and preparation will be available at the beginning of the course.
GRADING POLICY

A variety of means will be used to assess learning throughout the course.

1. **WEEKLY QUIZZES - 5% OF YOUR FINAL GRADE**: A five question quiz will be given at the beginning of each class covering the assigned readings for the lecture of that day. The quizzes will test factual knowledge. The questions will come directly from all three textbooks. Review of the quiz will occur immediately after its completion. One quiz grade will be thrown. Original quizzes will not be given back, but are accessible for student to see within one week of the quiz.

2. **CLASSROOM TESTS – 45% OF YOUR FINAL GRADE**: There are five classroom tests, one every three weeks. These tests may be comprehensive including previously tested material throughout the course. The questions will be application NCLEX style questions. Students may review a prior test taken for two (2) weeks after the test was given. Tests will not be available for review after that time.

3. **FINAL EXAM – 50% OF YOUR FINAL GRADE**: This test averaging 100 questions is given during final exam week. It will be comprehensive including all course materials.

4. **THE FINAL GRADE**: 5% weekly quizzes; 45% Classroom Tests; 50% Final Exam.

5. **ATI RN COMPREHENSIVE PREDICTOR EXAM**:
   - All students must take this exam.
   - If the student earns a 75% or better on this exam the student can choose to be exempt from taking the N202 course Final Exam. If so, all faculty and course evaluations must be completed.
   - Also, the student must have a classroom test average of 75% or higher in order to qualify for EXEMPTION FROM FINAL EXAM
   - If the student chooses to be exempt from taking the Final Exam the grade calculation would be as follows:
     - Test 1
     - Test 2
     - Test 3
     - Test 4
     - These five tests are averaged together.
     - This average becomes 45% of the grade plus the 5% weekly quiz average
     - This average is also taken as your final exam grade. Together they form your final grade for the course.

**EXAMPLE OF CALCULATIONS OF GRADE IF STUDENT IS EXEMPT FROM FINAL EXAM**:

- Test 1 80%
- Test 2 90%
- Test 3 75%  
  These five tests are averaged together
- Test 4 80%  
  The average is 81.4% = 45% of grade
- Test 5 82%  
  81.4% x .40 = 32.56 points
  Weekly quiz average is 75% = 5% of the grade = 75 x .05 = 3.75 points
  Now add the test points and quiz points to come up with the final test grade: 32.56 + 3.75 = 40.38 x 2 = 80.76 = Final grade.

6. **ATI TESTING**: ATI non proctored tests are available for the student to take to practice for the three proctored tests – mental health nursing, nursing care of the child and the RN comprehensive predictor. It is recommended that the student make a commitment to working extensively on the non proctored tests. This will not only lead to the possibility of earning a 75% on the RN comprehensive predictor with exemption of the final exam, but will also make it easier for the student to be successful on the NCLEX exam.
The student is expected to provide proof of taking the ATI non proctored test one week in advance of the scheduled proctored test. If this proof is provided to the lab instructor, after passing the course with a 75% or better, the student will receive 1 point per test (for a total of 3 possible points) added to the final grade.

The mental health nursing ATI will be taken in lab during week 6, after completion of the mental health lecture materials.

The nursing care of children ATI will be taken in the last lab of the semester during week 13 of the course.

The RN comprehensive predictor will be taken by all students in the computer labs as scheduled. The score earned on this test determines the student's eligibility to be exempt from the final exam.

7. All students are required to take the Comprehensive Predictor. This examination will be given no later than mid-semester (date TBD). Students who do not achieve the 75% passing score on the Comprehensive Predictor will be required to complete the guided instruction remediation (at no cost), complete the ATI practice Medical-Surgical exam and retake the exam prior to the end of the semester. If the student achieves the passing score on the second attempt, their letters of completion will be sent to the New Jersey State Board of Nursing upon program completion. If the student still does not achieve the passing score, they will be required to complete the New Jersey Council State Board of Nursing Review Course (cost $40-$60) and provide a certificate of successful completion of this course to the Nursing Program. At this time, their letter of completion will be sent to the New Jersey State Board of Nursing.

8. CLINICAL LABORATORY PERFORMANCE EVALUATION: Clinical objectives are graded twice during the med surg rotation, once during the pediatric rotation and once during the psychiatric rotation. THE STUDENT MUST PASS ALL THREE ROTATIONS IN ORDER TO PASS THE CLINICAL COMPONENT OF THE COURSE.

The final clinical grade must indicate that all objectives are met.

During the clinical experience, the student may receive a remediation plan if at any time the clinical objectives are “not met.”

If the student demonstrates unsafe practice, this will result in a clinical failure, thus failing the course.

9. Failure to complete all the above criteria results in a failure of Nursing 202.

10. Any student in this class who has special needs because of disability is entitled to receive accommodations. Eligible students at Mercer County Community College are assured services under the Americans with Disabilities Act and Section 504 of the Rehabilitation Act of 1973. If you believe you are eligible for services, please contact Arlene Stinson, the Director of Academic Support Services. Ms. Stinson's office LA217 and she can be reached at (609) 570-3525. Special arrangements for testing are made by appointment through this office. At the beginning of the semester the student needs to make arrangements in advance for the 5 tests and the final exam. This information must then be passed on to the Coordinator and Nursing Program Specialist, Stephanie Hernandez.

TESTING

1. Students must bring their student ID number to record on the test.
2. There will be a **50 question test given every three weeks**.
3. Each test will cover content presented during the **previous 3 weeks** of lecture and lab and all textbooks.
4. Each test will include **previously** tested content at the discretion of the instructor.
5. A **post test review** will occur immediately after the test to go over test taking skills and reinforce content. Attendance is required. **An individual test review** may be requested by the instructor and is expected for any **failing grade before going on to the next test**. These students are required to see the instructor before taking the next test.
6. The final exam will be **reviewed** on an individual basis at a time mutually agreed upon by student and instructor.

Guidelines For Tests

**During Tests:**

1. Students will be seated by instructor and must have their student ID to record on the test.
2. A #2 pencil, eraser and calculator are allowed at the seat. All other belongings go in front of the room (including coats, backpacks, etc.).
3. Please go to the restroom before coming to test.
4. **All CELL PHONES MUST BE TURNED OFF AND PLACED IN THE FRONT OF THE ROOM. NO RECORDING OR VISUAL RECORDING DEVICES ARE PERMITTED IN ROOM.**
5. No questions will be answered during the test unless there is a structural problem with the test.
6. When test is completed, raise your hand, walk to the end of the row and hand answer sheet to the instructor; leave quietly. Leave test booklet at your seat. All belongings must remain in the test room.
7. Return for test review.
8. If the student cheats during the test, the student will receive a "0" on that test.

**During Test Review:**

1. Students will be seated by instructor.
2. Students may not leave seat/room until test booklets have been collected and counted.
3. Nothing but test booklet and pen/pencil may be at desk during review.

**Academic Integrity Statement:**

Students are required to perform all the work specified by the faculty and are responsible for the content and integrity of all academic work submitted, such as papers, reports and examinations. A student will be guilty of violating the Rule of Academic Integrity if he or she:

- knowingly represents the work of others as his or her own;
- uses or obtains unauthorized assistance in any academic work;
- gives fraudulent assistance to another student.
- fabricates data in support of an academic assignment
- inappropriately or unethically uses technological means to gain academic advantage
Attendance

Mercer County Community College does not have a cut system. Students are expected to attend all lecture, college laboratory and clinical laboratory sessions. Records will be maintained for attendance at all lectures, college and hospital labs. Clinical Laboratory absences prevent an instructor from having an adequate opportunity to evaluate a student and prevent the student from achieving clinical objectives.

Please refer to the full Attendance Policy in the Nursing Program Information Packet Appendix.

MERCER COUNTY COMMUNITY COLLEGE
DIVISION OF SCIENCE AND HEALTH PROFESSIONS
NURSING PROGRAM
NUR 202
CLINICAL OBJECTIVES

MEDICAL SURGICAL NURSING CLINICAL OBJECTIVES

1. Be prepared to begin a career as a new graduate
2. Develop a more mature level of professionalism
3. Develop beginning leadership skills
4. Develop an increase in confidence in role as a beginning practitioner
5. Develop a sense of assertiveness
6. Develop an ability to care for multiple patient assignments
7. Learn to identify priority needs in multiple patient assignments for patients with multi-systems problems
8. Provide care to up to four patients in an organized fashion
9. Increase confidence and competence with technical skills
10. Learn to work collaboratively with your student group and the staff
11. Understand the steps necessary to make change
12. Advance your critical thinking skills

PEDIATRIC CLINICAL OBJECTIVES

1. Be able to provide a developmentally appropriate assessment of pediatric patients and their families.
2. To correlate the expected developmental stages with the observations seen of the pediatric patients in the various clinical/observation settings.
3. Be able to make developmental comparisons when observing well children in non hospital settings
4. Apply the nursing process when providing care to children in acute care settings.
5. Utilize critical thinking when correlating assessments of children and families with ordered therapies and medications.
6. Provide a developmentally appropriate teaching plan to groups of pediatric patients and their families.

MENTAL HEALTH CLINICAL OBJECTIVES

1. Being able to communicate effectively with patients having various psychosocial alterations in various settings.
2. Be able to perform a mental health assessment to patients with psychosocial alterations.
3. Be able to develop a nursing care plan for a patient with psychosocial alterations utilizing the nursing process effectively.
4. Be able to develop personal self-awareness skills by summarizing experiences in a journal format.
5. Develop/facilitate and evaluate a group program for hospitalized psychiatric patients.
6. Be able to utilize critical thinking when correlating assessments of patients with ordered therapies and medications.
7. Understanding the roles of the multidisciplinary treatment team members.
GUIDELINES FOR THE ORAL MEDICAL SURGICAL CASE STUDY PRESENTATION

Objectives:
The student will:
1. Collect data about a complex med-surg patient with multisystem problems.
2. Research all medical diagnosis, laboratory tests and diagnostic tests and medications showing relationships.
3. Apply the nursing process.
4. Present findings, sharing the responsibility with other students

Procedure:
1. Review chief complaint and treatment on admission (ER, Critical Care Unit, etc.). Include in this section a physical assessment upon admission and a brief medical history, including medications that the patient was taking prior to hospitalization and during hospitalization.
2. Describe the pathophysiology of the disease process, incorporating lab tests, and procedures performed.
4. Relate your physical assessment on the day(s) of care comparing it to the assessment done on admission by the MD. Was the patient getting better? Worse? How was this determined? Identify medications the patient was taking during the hospitalization and why.
5. What other members of the health care team were involved with this patient’s care? What recommendations were made by them? Why were they involved?
6. What discharge planning took place for this patient? What considerations had to be factored in prior to releasing this patient from the hospital?
7. Identify three (3) nursing diagnoses with the highest priority for this patient and four (4) other nursing diagnoses. Have the group chose them. Have the group set goals and identify nursing actions appropriate to the nursing diagnoses.
8. Would you have done anything different in caring for this patient than what was done during his/her hospitalization?

DIRECTIONS
1. This is not a written presentation. The student is expected to choose a patient that is of interest because of the patient’s multisystem involvement.
2. Each case study should take no more than 15-20 minutes. No more than 3 and no less than 2 students per case study presentation. Presentations will be made orally. No written papers need be handed in.
3. Approval needed by clinical instructor.

4. All medical diagnoses are to be researched and presented in your own words.

5. Significant laboratory tests and diagnostic tests are to be explained, showing relationships to diagnoses.

6. Patient medications before and during hospitalization are to be explained in relationship to diagnoses.

Revised: 12/03, 12/06, 7/07, 7/08, 6/10

GUIDELINES FOR THE ORAL PEDIATRIC TEACHING PLAN

Teaching is a common practice of the nursing process. Instruction can be formal or informal, and often require a teaching plan in order to meet the patient’s learning needs. This handout provides a brief overview of the development and implementation of a teaching plan.

Objectives:
The student will:
1. Utilize concepts of teaching and learning when implementing a pediatric teaching plan.
2. Utilize the nursing process to collect data, set goals for the teaching plan, implement the plan and evaluate the results.
3. Research information to teach a pediatric patient.
4. Present a teaching plan in a developmentally appropriate manner.

Assessment Phase:
1. The first step of the teaching plan is the assessment of the patient, the teacher and the teaching situation.
2. Collect data about the patient. Assessment of patient includes the patient’s age and developmental level, education, cultural background, economic background, physiological readiness to learn, psychological readiness to learn, willingness to learn, personal priorities and their level of understanding.
3. Identify your own learning needs, capabilities and readiness to teach.

Planning Phase: (Review with instructor)
1. Develop 2–3 measurable and reasonable patient oriented objectives.
2. Research topic that you plan to teach.
3. Develop a specific teaching plan that will facilitate accomplishment of the objectives.

Implementation Phase:
1. Implement the teaching plan to preschool children.
2. If you use handouts, clear these with your instructor first. No balloons or stickers are allowed.

Evaluation Phase:
Discuss effectiveness and teaching and if your goals were met in post conference.

Grading:
Satisfactory / Unsatisfactory – grade included on performance evaluation

Topic Selection:
Student needs approval from instructor for topic selection.

Revised: 7/01, 12/03, 7/07, 1/08, 6/10
Reviewed: 6/04, 12/04, 6/05, 12/05, 6/06, 12/06, 7/08, 12/08, 8/09, 1/10
GUIDELINES FOR THE ORAL PSYCHIATRIC NURSING CARE PLAN

Objectives:

The student will be able to:

1. Demonstrate application of the nursing process of a psychiatric patient.
2. Utilize provided forms found on NUR202 website.
3. Present the care plan orally in an organized method.
4. Utilized effective oral communication.
5. Able to apply critical thinking when presenting the oral care plan.
6. Able to identify choice of:
   a. identified problems
   b. goal/objectives
   c. intervention

Reviewed: 12/03, 6/04, 12/04, 6/05, 12/05, 6/06, 12/06, 7/07, 1/08, 7/08, 12/08, 1/10
Revised: 8/09, 6/10
### LEARNING OBJECTIVES

At the conclusion of this learning sequence the student will be able to:

- Understand therapeutic approaches in psychiatric nursing care.
- Be able to define the therapeutic functions of each approach specific to psychiatric alterations.
- Discuss the nurse's responsibility within each approach.
- Explain limitations of each therapeutic approach.

# Learning Objectives

Discuss alterations in psychosocial adaptations related to development of eating disorders.

Describe appropriate nursing interventions for behaviors associated with eating disorders.

Apply the nursing process when caring for a patient with eating disorders.

## Content Outline

### I. Eating Disorders

A. Define obesity, anorexia nervosa, bulimia nervosa.

B. Describe holistic assessment approach indicating an eating disorder.

C. Identify developmental, genetic and family influences on individuals who develop eating disorders.

D. List nursing diagnoses for patients with an eating disorder.

E. Describe outcome criteria used for measurement of outcomes for care of patients with eating disorders.

F. Explain a teaching plan for a patient with an eating disorder.

G. Design a plan of nursing intervention for a patient with an eating disorder.

## Learning Activities

Readings: Eating Disorders, Chap. 34

LEARNING OBJECTIVES

Describe the following palliative/corrective surgical procedures and identify for which congenital defect they are used:
- Arterial switch
- Fontan
- Modified Blalock-Taussig
- Mustard or senning
- Norwood
- Patent ductus arteriosus ligation
- Rashkind
- Valvuloplasty

Define the various types of valvular heart disorders describing the pathophysiology, clinical manifestations and management of each one.

Identify the various types of valvuloplasty.

Identify the types of valve replacements and the advantages/disadvantages of each.

Identify the microorganisms that may cause cardiac valve disease and their port of entry.

Define chemoprophylaxis in relation to cardiac valve disease and nursing implications.

Compare the infectious disease of the heart, identifying their causes, pathologic changes, clinical manifestations, management and prevention.

Describe how a heart-lung bypass machine is utilized during cardiac surgery.

Identify the problems associated with cardiopulmonary bypass.

CONTENT OUTLINE

IV. Cardiopulmonary bypass
A. Transplantation
B. Mechanical assist devices and total artificial hearts
C. Pre-op nursing management
D. Intro-op nursing management
E. Post-op nursing management
F. Complications of cardiac surgery

V. Aortic Aneurysms
A. Classifications
B. Thoracic
C. Abdominal
D. Dissecting

VI. Medications Used
A. Cardiac glycosides
B. Dysrrhythmics
C. Anticoagulants

   C. Management
   D. Nursing interventions
   E. Gerontologic considerations

VII. Kidney Transplant
   A. Pre-op management
   B. Post-op management

VIII. Urinary Diversions
   A. Ileal conduit urinary diversion
   B. Continent ileal urinary reservoir
   C. Ureterosigmoidostomy
   D. Cutaneous ureterostomy
### Learning Objectives

Identify the risk factors and clinical manifestations for cancer of the larynx.

Describe the anatomical alterations produced by the various types of laryngeal surgeries for laryngeal cancer.

Using the nursing process as a framework, identify the nursing concerns (both pre- and post-op) for the patient with laryngeal cancer.

Identify the patient education and home care considerations for the laryngectomy patient.

Using the nursing process as a framework, identify the nursing concerns/care (both pre-and post-op) for the patient undergoing a neck dissection.

Describe the nursing interventions to be used with the patient undergoing chemotherapy for lung cancer.

Identify risk factors and clinical manifestations for lung cancer.

Describe the surgical procedures used to treat/manage lung cancer.

Using the nursing process as a framework, identify nursing concerns/care (both pre- and post-op) for the patient undergoing thoracic surgery.

### Content Outline

**I. Cancer of the Larynx**

**A. Demographics**
   1. Who is at risk
   2. Causative agents
   3. Anatomical areas affected

**B. Clinical Manifestations**
   1. Early signs
   2. Late signs

**C. Diagnostics**
   1. X-ray studies
   2. Biopsies
   3. Tumor classifications

**D. Medical Management**
   1. Radiation
   2. Surgery
      a. partial laryngectomy
      b. supraglottic laryngectomy
      c. hemivertical laryngectomy
      d. total laryngectomy

**E. Nursing Care of the Laryngectomy Patient**
   1. Assessment
   2. Goals
   3. Pre-op interventions
   4. Post-op interventions

**F. Patient Education**
   1. Care of tracheostomy
   2. Respiratory precautions
   3. Discharge concerns

**G. Radical Neck Dissection**
   1. Anatomical changes
   2. Nursing care
      a. goals
      b. pre-op interventions
      c. post-op interventions

### Learning Activities

- **Lilley:**
  - *Chapter 45* Antineoplastic Agents

- **Ignativing/Workman:**
  - *Chapter 31* Review tracheostomy and oxygen therapy
  - *Chapter 32* Cancer of the larynx
  - *Chapter 33* Lung cancer, chest drainage
**LEARNING OBJECTIVES**

Describe the principles of water-seal chest drainage and the nursing responsibilities related to the care of the patient with water-seal chest drainage system.

Describe the patient education and home care considerations for patients who have had thoracic surgery.

---

**CONTENT OUTLINE**

II. Lung Cancer
   A. Demographics

LEARNING OBJECTIVES

Compare and contrast Type I and Type II diabetes as to cause, clinical manifestations, medical management.

Create a schematic diagram to describe the pathophysiology of diabetic ketoacidosis.

Using the above schematic diagram, identify clinical signs/symptoms of diabetes.

Identify the diagnostic tests utilized to diagnose diabetes mellitus.

Identify the medications utilized in treating the diabetic patient and describe how they work.

Compare and contrast hypoglycemia, diabetic ketoacidosis and hyperosmolar nonketotic syndrome.

Identify the long-term effects of diabetes.

Using the nursing process as a framework, develop a plan of care for the diabetic patient.

Describe the pathophysiology of celiac disease and related clinical manifestations.

Identify the treatment for celiac disease.

Identify the physiologic effects of cystic fibrosis.

CONTENT OUTLINE

I. Types of Diabetes
   A. Type I

   B. Clinical Manifestations  
   C. Etiology and Pathophysiology  
   D. Diagnostic Tests  
   E. Medical Management  
   F. Nursing Management
LEARNING OBJECTIVES

Describe the functions and hormones secreted by each of the endocrine glands.

Identify the diagnostic tests used to determine alterations in function of each of the endocrine glands.

Compare hypo- and hyperthyroidism as to cause, clinical manifestations, management and nursing intervention.

Compare hypo- and hyperparathyroidism as to cause, clinical manifestations, management and nursing interventions.

Compare Addison’s Disease with Cushing’s Syndrome: causes, clinical manifestations, management and nursing interventions.

Identify the teaching needs of patients requiring corticosteroid therapy.

CONTENT OUTLINE

I. Physiologic Overview
   A. Pituitary Gland
   B. Thyroid Gland
   C. Adrenal Gland
   D. Parathyroid Gland
   E. Pancreas

II. Assessment
   A. Tests of thyroid function
   B. Diagnostic evaluation of hyper- and hypoparathyroidism
   C. Diagnostic evaluation of adrenal glands
      1. Pheochromocytoma
      2. Addison’s disease
      3. Cushing’s disease

III. Diseases
   A. Hypothyroidism
   B. Hyperthyroidism
   C. Hyperparathyroidism
   D. Hypoparathyroidism
   E. Pheochromocytoma
   F. Addison’s disease
   G. Cushing’s disease

IV. Corticosteroid Therapy
   A. Side Effects
   B. Patient Teaching

LEARNING ACTIVITIES

Ball and Bindler:
Chapter 22 Alterations in Endocrine Function, pg. 821-861

Lilley:
Chapter 28 Pituitary Agents
Chapter 29 Thyroid and Antithyroid Agents
Chapter 31 Adrenal Agents

Ignatavicious/Workman:
Chapter 65 Assessment of endocrine
Chapter 66 Pituitary & adrenal
Chapter 67 Thyroid & parathyroid
### LEARNING OBJECTIVES

Describe the pathophysiology of increased intracranial pressure.

Identify the early and late clinical manifestations of increased intracranial pressure.

Identify those situations where the patient might experience increased intracranial pressure.

Identify the special nursing interventions necessary for managing IICP caused by:
- Brain tumors
- Meningitis
- Intracranial abscess
- Intracranial aneurysm
- Convulsive disorders
- Head injuries
- Hydrocephalus

Using the nursing process as a framework, create a care plan for the patient with increased intracranial pressure.

Describe specific nursing actions and their rationale in caring for an unconscious patient.

Describe how cerebral hemorrhage might increase intracranial pressure.

Using the nursing process as a framework, create a plan for the patient undergoing intracranial surgery.

Identify the medications commonly used in treating the patient with neurologic dysfunction.

### CONTENT OUTLINE

#### I. Increased Intracranial Pressure

- A. Pathophysiology
- B. Clinical Manifestations
- C. Management
- D. Complications
- E. The Patient with IICP
- F. Monitoring Intracranial Pressure
- G. Nursing Implications of ICP Monitoring
- H. Causes of IICP

#### II. The Patient with Neurologic Dysfunction

- A. Assessment
- B. Goals
- C. Nursing Interventions

#### III. The Unconscious Patient

- A. Diagnostic Evaluation
- B. Medical Management
- C. Complications
- D. The Unconscious Patient

#### IV. Cerebral Hemorrhage

- A. Extradural
- B. Subdural
- C. Subarachnoid
- D. Intracerebral

#### V. The Patient Undergoing Intracranial Surgery

- A. Surgical Approaches
- B. Diagnostic Evaluation
- C. Management
- D. Nursing Care
- E. Transphenoidal Surgery

#### VI. Anticonvulsants

- A. Epilepsy

#### VII. Osmotic Diuretics
### Learning Objectives

- Compare and contrast the pathophysiology of multiple sclerosis, Parkinson’s disease, and myasthenia gravis.

- Using the nursing process as a framework, identify the care required for the patient having multiple sclerosis, Parkinson’s disease, and myasthenia gravis.

- Describe the medical and nursing management of a patient with neurological problems due to cranial nerve involvement.

- Describe the pathophysiology of a herniated intervertebral disc and correlate clinical manifestations.

- Describe the conservative medical and nursing management of a patient with a herniated disc.

- Identify the emergency medical goals for a patient with a spinal cord injury.

- Explain the nursing actions in caring for a patient undergoing treatment for a spinal cord injury.

- Construct a nursing care plan for a patient who is a paraplegic including short and long term goals.

- Identify the care to be given to the patient having an amputation: pre-op, post-op, rehab, and psychological.

### Content Outline

#### I. Multiple Sclerosis
- Pathophysiology
- Clinical Manifestations
- Diagnostic Evaluations
- Management
- Nursing Assessment
- Nursing Interventions

#### II. Parkinson’s Disease
- Pathophysiology
- Clinical Manifestations
- Diagnostic Evaluations
- Management
- Nursing Assessment
- Nursing Interventions

#### III. Myasthenia Gravis
- Pathophysiology
- Clinical Manifestations
- Diagnostic Evaluations
- Medical Management
- Surgical Management
- Myasthenic Crisis vs. Cholinergic Crisis
- Nursing Assessment
- Nursing Interventions

#### IV. Cranial Nerve Disorders
- Trigeminal Neuralgia
- Bell’s Palsy
- Guillain-Barré Syndrome

#### V. Herniation of an Intervertebral Disc
- Clinical Manifestations
- Diagnostic Evaluation
- Management

### Learning Activities

- **Ball and Bindler:**
  - *Chapter 20* Alterations in Neurologic Function, pg. 725-778
  - *Chapter 21* Amputations, pg. 816-817

- **Lilley:**
  - *Chapter 13* Anti-Parkinsonian Agent
  - *Chapter 19* Cholinergic Agents
  - *Chapter 65* Brain Tumors, Parkinson’s Disease, ALS, Degenerative Disc, Herniated Disc
  - *Chapter 69* Amputation, pg. 2103-2110
  - *Chapter 63* Head Injury, Spinal Cord Injury

Verbs that may be useful in formulating and assessing
Student learning goals and objectives
(listed from lower-order to higher-order learning)

Knowledge (list, define, describe, identify, state, name, [who/when/where])

Comprehension (summarize, describe, interpret, contrast, predict, distinguish, discuss, paraphrase)

Application (complete, illustrate, examine, classify, discover, solve, use)

Analysis (analyze, order, connect, arrange, compare, contrast, explain, infer, categorize, discuss)

Synthesis (combine, integrate, create, design, hypothesize, develop, formulate, rewrite)

Evaluation (judge, assess, convince, support, justify, rank, recommend, choose, criticize)

This listing, generally known as Bloom’s Taxonomy, relates to cognitive behaviors (B.S. Bloom, “Major Categories in the Taxonomy of Educational Objectives,” 1956).

Student learning objectives can also be stated in terms of affective and psychomotor Objectives:

- Affective objectives emphasize feeling and emotion (e.g., accept, attempt, challenge, defend, dispute, join, judge, praise, question, share, support and volunteer).
- Psychomotor objectives are concerned with motor skills (e.g., measure, dissect, assemble, …).

For more resources on this topic, many helpful websites are available. For example:
http://www.humboldt.edu/~tha1/bloomtax.html
Course: NURS 202 (Nursing IV) 9 week clinical experience in Medical Surgical Nursing

Student: ____________________________________________ MCCC ID # ________________________________

Semester: ____________________________ Clinical Facility: ______________________________________________

1. Program objective: Functions within the provisions of the Nurse practice Act while maintaining professional standards, the Code of Ethics and accepting responsibility for self growth and life-long learning

<table>
<thead>
<tr>
<th>Evaluation Period:</th>
<th>Week 4</th>
<th>Week 9</th>
</tr>
</thead>
<tbody>
<tr>
<td>Clinical Competency: Demonstrate professional and ethical behaviors</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Clinical Performance Criteria for multiple patient assignments (includes, but not limited to):

1. Complies with agency and MCCC nursing program policies and standards.
2. Treats all individuals with dignity and respect.
3. Is prepared for clinical experiences and observations
4. Utilizes objectives for clinical/observation experience preparation and verbalizes summaries in post conference
5. Protects patient rights (privacy, autonomy, confidentiality)
6. Practices within the legal and ethical framework of nursing.
7. Demonstrates appropriate professional behaviors (attendance, punctuality, honesty, appearance, attitude, acceptance of criticism)
8. Reports errors promptly
10. Maintains professional boundaries.
11. Accepts responsibility for assigned group of patients
12. Demonstrates accountability for actions.

Comments: (Areas requiring improvement, areas of strength)
2. Program Objective: Assess the patient’s health status in a comprehensive and holistic manner.

| Clinical Competency: Collect and analyzes comprehensive patient assessment data |
|---------------------------------|---------|---------|
| Evaluation Period:              | Week 4  | Week 9  |

**Clinical Performance Criteria for multiple patient assignments (includes but not limited to):**

1. Uses correct techniques for physical assessment.
2. Uses effective interview and data collection techniques.
3. Identifies support systems and relevant laboratory, diagnostics test results, and procedures.
4. Validates data collected for accuracy.
5. Adapts assessment techniques for groups of patients based on individual patient needs and characteristics (culture, spiritual, age, developmental level, illness, mental state).
6. Reports abnormal data and changes in patients condition to the instructor and appropriate health care professional.
7. Assesses groups of patients in a timely and efficient manner.
8. Assesses groups of patients and families based on basic human needs.
9. Anticipates changes in health status of groups of patients based on assessments.
10. Utilizes an efficient method of data collection when organizing collected information for multiple patient assignments (student created form, hospital form, course form).
11. Utilizes available technology to collect data necessary to provide appropriate care to groups of patients.

**Comments:** (Areas requiring improvement, areas of strength)
3. Program Objective: Provide individual patient care in a safe physical and psychological environment.

**Clinical Performance Criteria for multiple patient assignments (includes but not limited to):**

1. Recalls patient medication information including classification, indication, action, dosage, side effects, interactions, and nursing implications.
2. Calculates medication dosages and IV rates correctly.
3. Checks “seven” rights and patient identifiers prior to medication administration.
4. Performs appropriate assessments prior to, during, and after medication administration.
5. Follows correct procedures in preparing and administering medications.
6. Utilizes critical thinking when administering medications to a group of patients.
7. Administers medications within the agency-allotted timeframe.
8. Evaluates the effects of medications administered while identifying if appropriate clinical outcomes have been achieved.
9. Incorporates assessment data in decision-making related to medication administration.
10. Relates patients’ medications to their health status.
11. Documents medication administration correctly according to agency policy.

Comments: (Areas requiring improvement, areas of strength)
5 Program Objective: Analyze, synthesize and evaluate patient-related data to develop and implement individualized patient care and teaching plans.

**Clinical Performance Criteria for multiple patient assignments (includes but not limited to):**

1. Determines and supports patient preferences when caring for multiple patient assignments.
2. Prepares patients for interventions with multiple patient assignments.
3. Performs nursing skills competently to groups of patients.
4. Demonstrates caring behaviors towards groups of patients and families.
5. Responds to patients in distress in order of priority.
6. Ensures groups of patients’ ADLs are completed.
7. Considers patients’ family and community when developing and implementing the plan of care.
8. Independently implements nursing care plan to multiple patient assignments in an organized fashion.
9. Utilizes priority patient needs to determine order of care provided to multiple patient assignments.
10. Modifies interventions in a flexible manner to multiple patient assignments based on changing health needs.
11. Independently manages time constructively with multiple patient assignments.
12. Assesses multiple patients learning needs.
13. Provides patient teaching when appropriate with multiple patient assignments.

Comments: (Areas requiring improvement, areas of strength)
6. Program objective: Evaluate the achievement of patient outcomes.

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>Week 4</td>
</tr>
</tbody>
</table>

Clinical Performance Criteria for multiple patient assignments (includes, but not limited to):

1. Gathers adequate, relevant information for decision-making for a group of patients.
2. Reports abnormal data and changes in patient condition to the instructor and appropriate health care professional.
3. Responds appropriately to information from team members and/or other sources.
4. Uses data/evidence to support decisions in providing nursing care for a group of patients.
5. Validate nursing decisions with instructor or health care professional when doing new procedures
6. Anticipates patient/family care needs for a group of patients
7. Cluster data to identify patient/nursing problems for groups of patients.
8. Identify priority problems for a group of patients.
9. Plan individualized nursing care with appropriate outcomes for a group of patients.
10. Use critical thinking strategies in decision-making and care planning for a group of patients.
11. Modify patient care based on evaluation for a group of patient

Comments: (Areas requiring improvement, areas of strength)

7. Program objective: Incorporate within nursing practice advocacy for patient’s rights taking into consideration cultural diversity, socioeconomic and political forces.

<table>
<thead>
<tr>
<th>Clinical Competency: Act as a patient advocate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Week 4</td>
</tr>
</tbody>
</table>

Clinical Performance Criteria for multiple patient assignments (includes, but not limited to):

1. Promotes access to health care for a group of patients.
2. Protects patients’ right to make independent choices.
3. Prevents harm for a group of patients.
4. Eliminates potential sources of injury for a group of patients.
5. Monitors the quality of patient care for a group of patients.
6. Identifies and provides names and numbers of supportive organizations appropriate to medical diagnosis for a group of patients
8. Program objective: Collaborate with others to respond to the needs of individuals, families, and groups across the health-illness continuum.

| Clinical Performance Criteria for multiple patient assignments (includes, but not limited to): |
|---|---|---|
| 1. Uses appropriate channels of communication. |   |   |
| 2. Reports complete, accurate, pertinent information to instructor and staff. |   |   |
| 3. Maintains effective communication with peers, staff, and instructor. |   |   |
| 4. Conveys mutual respect, trust, support, and appreciation for other members of the student team and health care team. |   |   |
| 5. Contributes to projects, discussions, and pre and post-conferences. |   |   |
| 6. Confers with other health care and student team members regarding patient care needs. |   |   |
| 7. Reviews collaborative behaviors when working with student and health team members leading to achievement of patient outcomes |   |   |
| 8. Applies conflict resolution and problem solving skills as appropriate. |   |   |
| 9. Facilitates continuity of care within and across health care settings (e.g. transfer reports, referrals). |   |   |
| 10. Be able to delegate care appropriately |   |   |

Comments: (Areas requiring improvement, areas of strength)

Remediation Plan Instituted _______________________________(attach copy)

Clinical Evaluation Grading Criteria:

Met Performance criteria met, performing as expected for this level
Not Met Performance criteria not met, areas needing improvement require remediation plan.
Unsafe Significant concerns for patient safety

Scoring
An evaluation criterion is assigned for each program objective and competency twice during the clinical evaluation period.
A designation of “Not Met” requires a written remediation plan.
Receiving “Unsafe” in any of the competencies will result in a clinical failure for the course.
Faculty reserve the right to document an evaluation at any time during the clinical rotation

<tbody>
<tr>
<td><strong>Clinical Competency: Document effectively.</strong></td>
<td></td>
</tr>
</tbody>
</table>

**Clinical Performance Criteria (includes, but not limited to):**

4. Documents, completes, accurate, pertinent information in a timely manner.
5. Completes documentation according to agency guidelines (format, timing, abbreviations, etc.)
6. Uses appropriate terminology, spelling and grammar in written communications.

**Clinical Evaluation Grading Criteria:**

- **Met**
  - Performance criteria met, performing as expected for this level
- **Not Met**
  - Performance criteria not met, areas needing improvement require remediation plan.
- **Unsafe**
  - Significant concerns for patient safety

**Remediation Plan Instituted** (attach copy)

**Scoring**

An evaluation criterion is assigned for each program objective and competency twice during the clinical evaluation period.

A designation of “Not Met” requires a written remediation plan.

**Receiving “Unsafe” in any of the competencies will result in a clinical failure for the course.**

Faculty reserve the right to document an evaluation at any time during the clinical rotation.
