The screenshot displays the TurboTax Federal Free Edition software interface. At the top right, there are navigation links: Print Center, Flags, Tools, Help Center, and Save & Exit. The main header area includes the TurboTax logo and the text "Federal Free Edition". Below this, a large dark button displays "\$0 Federal Refund". A sidebar on the left contains a "Home" section with a "Program Options" link, and a list of menu items: Personal Info, Federal Taxes, State Taxes, Review, and File. At the bottom of the sidebar is an "Upgrade" button. The main content area features a search bar with the placeholder text "Ask a question, such as 'What is a W-2?'" and an "Ask" button. Below the search bar is a large image of three smiling people (two women and one man) standing together. To the left of the image, the text reads "Hi, welcome to TurboTax!" followed by a paragraph: "We know you work hard for your money. That's why we're here for you to help you get back every dollar you deserve." A blue "Start" button is positioned below this text. At the bottom of the main content area, there is a section titled "We can also help you with:" followed by a list of three options: "Upgrade your TurboTax product", "File an extension", and "Amend (change) a return that was filed and accepted".

Productivity and Business Software: Software for Large and Specialized Businesses

PROJECT MANAGEMENT

Creates scheduling charts to plan and track specific tasks and to coordinate resources

CUSTOMER RELATIONSHIP MANAGEMENT (CRM)

Stores sales and client contact information in one central database

ENTERPRISE RESOURCE PLANNING (ERP)

Controls many “back office” operations and processing functions such as billing, production, inventory management, and human resources management

E-COMMERCE

Facilitates website creation and hosting services, shopping cart setup, and credit-card-processing services

VERTICAL MARKET

Addresses the needs of businesses in a specific industry or market such as the real estate, banking, and automotive industries

COMPUTER-AIDED DESIGN (CAD)

Creates automated designs, technical drawings, and 3-D model visualizations for architecture, automotive, aerospace, and medical engineering industries

Check Your Understanding

1. What's the difference between application software and system software?

- The term software refers to a set of instructions that tells the computer what to do.
- Application software is the software you use to do everyday tasks at home, school, and work. Application software includes the following:
- System software is the software that helps run the computer and coordinates instructions between application software and the computer's hardware devices. System software includes the operating system and utility programs.

Check Your Understanding

2. What are the different ways I can access and use software?

- There are two types of software that you can install on your computer:
 - Proprietary (or commercial) software is software you buy.
 - Open source software is program code that is free and publicly available with few licensing and copyright restrictions. The code can be copied, distributed, or changed without the stringent copyright protections of software products you purchase.
- Web-based applications are those that are hosted online by the vendor and made available to the customer over the Internet. This web-based distribution model is also referred to as Software as a Service (SaaS). Web-based applications are accessed via an Internet connection to the site that hosts the software.

Check Your Understanding

3. What kinds of applications are included in productivity software?

Productivity software programs include the following:

- Word processing: to create and edit written documents
- Spreadsheet: to do calculations and numerical and what-if analyses easily
- Presentation: to create slide presentations
- Database: to store and organize data
- Note-taking: to take notes and easily organize and search them
- Personal information manager (PIM): to keep you organized by putting a calendar, address book, notepad, and to-do lists within your computer

Individuals can also use productivity software to help with business-like tasks such as managing personal finances and preparing taxes.

Check Your Understanding

4. What kinds of software do small and large businesses use?

Businesses use software to help them with the following tasks:

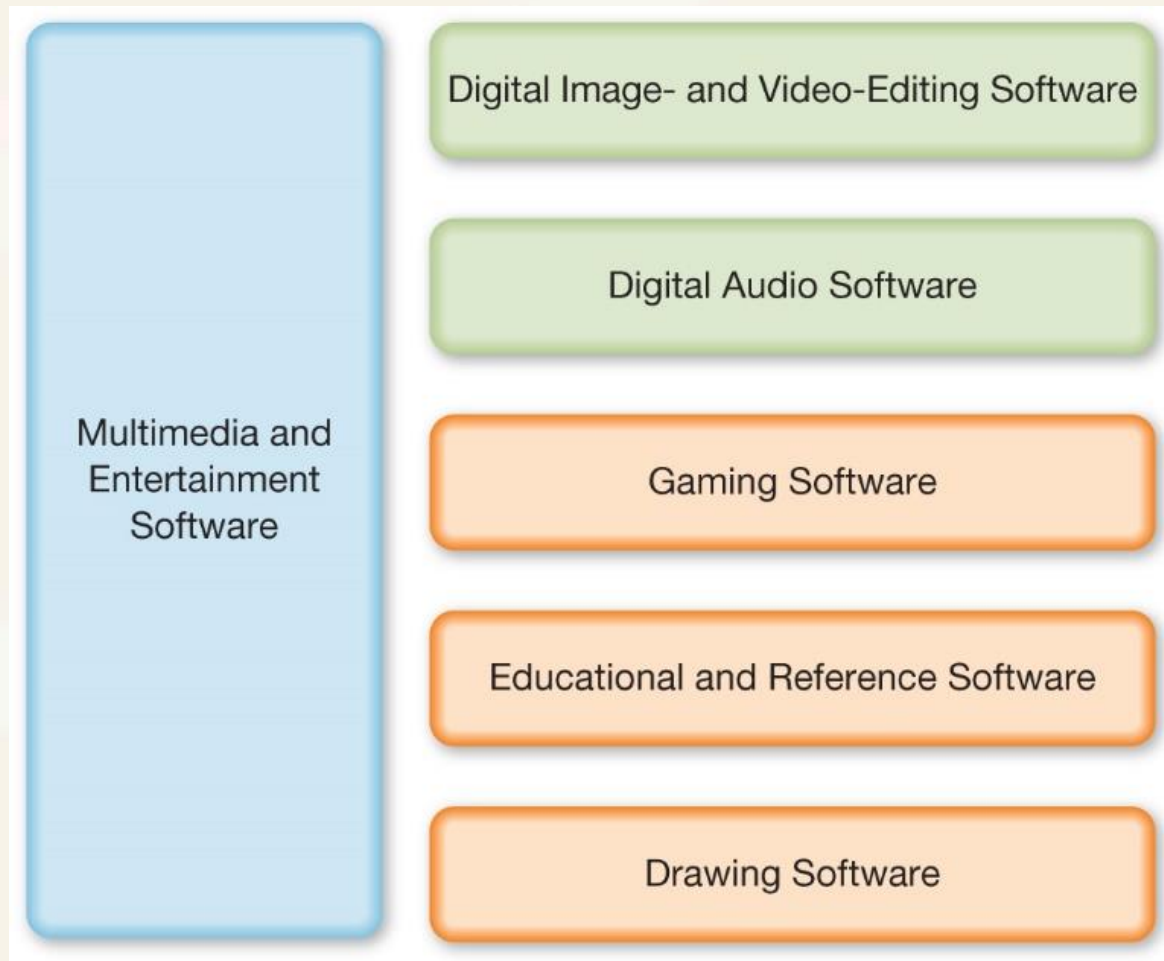

- Finances and accounting
- Desktop publishing
- Web page authoring
- Project management
- Customer relationship management (CRM)
- Enterprise resource planning (ERP)
- E-commerce

Businesses may use specialized business software (or vertical market software) that is designed for their specific industry. Some businesses also use specialized drawing software to create technical drawings and computer-aided design (CAD) software to create 3-D models.

Multimedia and Entertainment Software

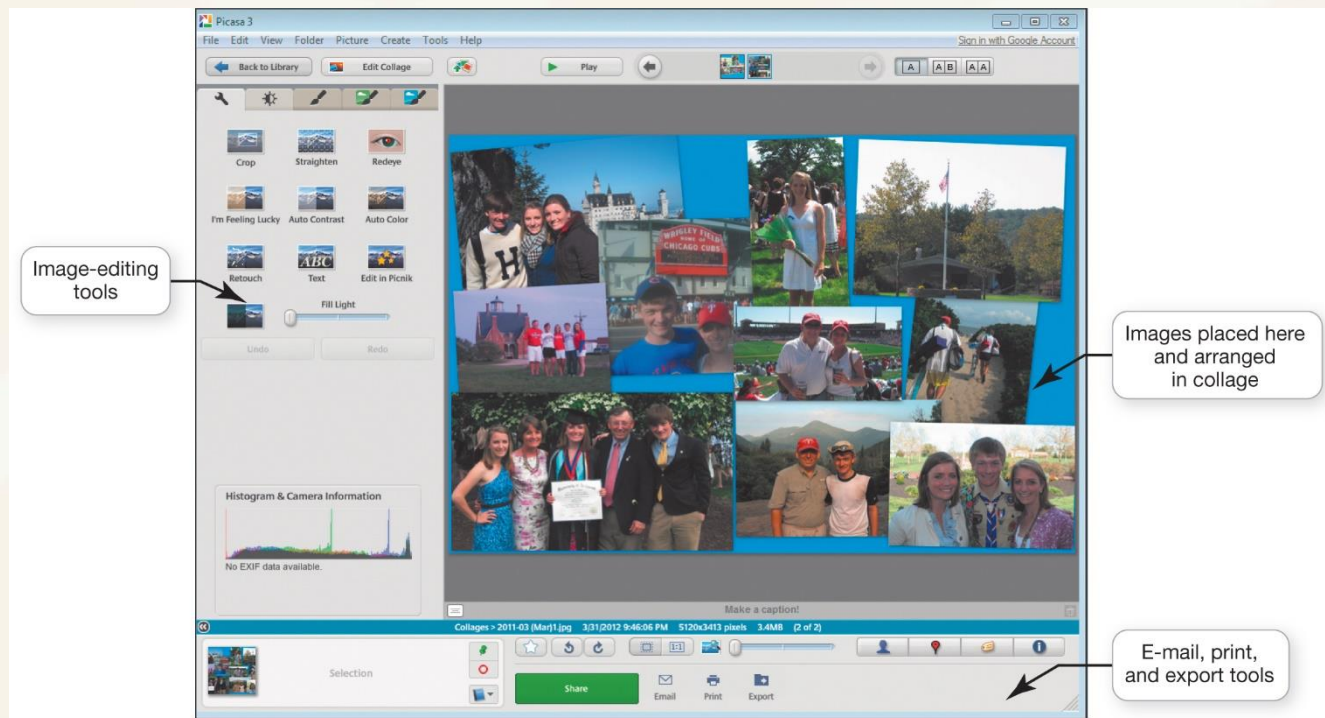

Multimedia and Entertainment Software: Digital Image- and Video-Editing Software

- Image-editing software
- Edit photographs and other images
- Online photo-sharing and photo-storing sites

Multimedia and Entertainment Software: Digital Image- and Video-Editing Software

- Examples
 - Adobe Photoshop Elements
 - Google Picasa

Multimedia and Entertainment Software: Digital Image- and Video-Editing Software

- Professional image editors might use:
 - Adobe Photoshop
 - Corel PaintShop Photo Pro
 - GIMP

Multimedia and Entertainment Software: Digital Image- and Video-Editing Software

- Video-editing software
- Examples
 - Adobe Premiere Pro and Apple's Final Cut Pro
 - Windows Movie Maker and iMovie

Multimedia and Entertainment Software: Digital Audio Software

- Digital audio files
- Downloaded music files, audiobooks, or podcasts
 - Compressed: MP3, ACC, WMA
 - Uncompressed: WAV, AIFF
- Create and record audio files
- Audio-editing software

Multimedia and Entertainment Software: Gaming Software

- Create characters to extend a game
 - EverQuest
 - Oblivion
 - Unreal Tournament
- Create your own games
 - Unity
 - Adobe Flash
 - RPG Maker VK
 - GameMaker

Multimedia and Entertainment Software: Educational and Reference Software

Test Preparation

Designed to improve your performance on standardized tests

Simulation

Allows you to experience a real situation through a virtual environment

Instructional

Designed to teach you almost anything from playing a musical instrument to learning a language or cooking

Trip Planning

Generates maps and provides driving instructions; some incorporate hotel, restaurant, and other trip information

Home Design/ Improvement

Provides 2-D or 3-D templates and images to let you better visualize indoor and outdoor remodeling projects and landscaping ideas

Course Management

Web-based software system that creates a virtual learning experience, including course materials, tests, and discussion boards

Brain Training

Features games and activities to exercise your brain to improve your memory, processing speed, attention, and multitasking capabilities

Genealogy

Helps chart the relationships between family members through multiple generations

Check Your Understanding

5. What types of multimedia and entertainment software are available?

- Multimedia software is software for playing, copying, recording, editing, and organizing multimedia files. Multimedia software includes the following:
 - Digital image- and video-editing software
 - Digital audio software
 - Specialty software to produce computer games
- Educational and reference software is available to help you master, study, design, create, or plan.
- Simulation (training) programs let users experience or control the software as if it were the actual software or an actual event.
- Course management software provides traditional classroom tools such as discussion areas, assignment features, and grade books over the Internet.
- Drawing software helps you create and edit simple line-based drawings or create more-complex designs for both imaginative and technical illustrations.

Check Your Understanding

6. What's important to know when buying software?

- You must purchase software unless it is freeware or open source.
- You're actually purchasing the license to use it and therefore must abide by the terms of the licensing agreement you accept when installing the program.
- Before installing software on your computer, ensure that your system setup meets the system requirements that specify the minimum recommended standards for the operating system, processor, primary memory (RAM), and hard drive capacity. Sometimes, there are other specifications for the video card, monitor, optical drive, and other peripherals.

Check Your Understanding

7. How do I install and uninstall software?

Installing:

- A full installation copies all the files and programs from the distribution disc to your computer's hard drive.
- A custom installation lets you decide which features you want installed on your hard drive.

Uninstalling:

- It's best to use the uninstall feature that comes with the operating system.
- Using the uninstall feature of the operating system when uninstalling a program will help you ensure that all additional program files are removed from your computer.
