

Average Value

between a & b

$$\text{Ave. Value} = \frac{\int_a^b f(x) dx}{b-a}$$

Find average value between -2 & 2

$$\frac{\int_{-2}^2 4 - x^2 dx}{2 - (-2)} = \frac{4x - \frac{x^3}{3} \Big|_{-2}^2}{4}$$

$$= \frac{\left(4(2) - \frac{(2)^3}{3}\right) - \left(4(-2) - \frac{(-2)^3}{3}\right)}{4}$$

Leisr' topic

Substitution with Definite Integral

$$\int_0^4 \sin(x^2) x dx$$

13. Did the student graph the second derivative identify the concavity at every data point?

X:	-2	4	6	8	10	12	14	16	18
Y''	-9	-6	-5	+1	+3	+5	+7	+9	+13
Concavity? Up or Down	down	down	down	up	up	up	up	up	up

14. Did the student take the second derivative and identify concavity for the zero of the cubic regression?

$Y'' = 2Ax + 2B$ 1.16 $72.5x + 10$

Zero: (from #9): ~~1.16~~ zero was at 1.2

$Y''(\text{zero}) = Y''(1.2) = -1.1$

Were inflection points identified?

$Y''=0$ at $-b/(6a)$: 7.5

15. Was the area under the best regression and between the first and last values found using calculator and the Fundamental Theorem?

Calc 7: $\int f(x) dx$

~~1.2~~

$f(x) = 110x$
 225.64

Calc 7: lower 1.2 Upper: 18

(cubic)

Regression $f(x)$: $5.72x^3 - 7.4x^2 + .05x + 2.56$

Antiderivative: $F(x)$: $5.72 \dots x^4/4 - 7.4 x^3/3 + .05 x^2/2 + 2.56x + C$

$F(\text{upper}) - F(\text{lower})$: $F(70) - F(10)$

$253.51 - 27.921 = 225.64$

16. Was the area under the best regression and between the first and last values approximated using left and right endpoint rectangles?

$\Delta x = \frac{70 - 10}{8} = 7.5$

X:	10	17.5	25	32.5	40	47.5	55	62.5	70
Y:	2.1	5.1	6.2	5.2					

Sum of 8 rectangles left endpoints: 220.18 Right endpoints: 231.05

17. Were the units identified for the area under the curve?

Units (y) * Units (x) = $\text{minutes} \times \text{feet} = \text{ft} \cdot \text{mins}$

Was the average value given?

Area (from 15) divided by (last x - first x): $\frac{225.64 \text{ ft} \cdot \text{mins}}{70 - 10 \text{ mins}} = 3.76 \text{ ft}$

18. Did the student write two reviews of other students' projects? Were two reviews written of the student's paper? Who is reviewing you? _____ and _____

Notes for review 1:

Notes for review 2:

19. Did the student do a classroom presentation on time or was a You Tube video link provided?

20. Was the final project handed in on time?
