**Catalog description:**
Under the guidance of an area sponsor in an industrial or academic environment, students participate in a chemistry research project. This course requires a written and oral presentation to students and faculty. It may be applied to fulfill a technical elective requirement in the Biology, Chemistry or Physics program or other program upon the program coordinator’s approval. *6 laboratory hours per week*

Participation in Biology, Chemistry and Physics laboratory courses is permitted provided the student has completed the required prerequisites, is a minimum of 16 years of age or by the permission of the instructor and the Dean of the division.

**Is course New, Revised, or Modified?** Revised

**Required texts/other materials:**
STUDENT LAB NOTEBOOK

**Revision date:** September, 2016

**Course coordinator:** Helen Tanzini, Rm. MS133  
609-570-3349  
Tanzinih@mccc.edu

**Information resources:**
The library has a collection of books that students may use for reinforcement of the content being taught in this course.

**Other learning resources:**
Tutors: The learning center is located on the second floor behind the bookstore. Students are accommodated on a walk in basis. Consult http://www.mccc.edu/student_services_learncenter_ww.shtml for tutor schedules

**Accommodations:**
Eligible students at Mercer County Community College are assured services under the Americans with Disabilities Act and Section 504 of the Rehabilitation Act of 1973. Contact Arlene Stinson, Director of Academic Support Services. 570-3525.
Course Competencies/Goals:

The student will be able to:

1. Construct, execute then evaluate a research plan in a research laboratory related to chemistry [GE Goal 3, 4; Core Skills A, B, D, F]

2. Develop skills in observation, organizing and analyzing data, synthesizing information, and communicating conclusions orally and in writing [GE Goal 1, 3, 4; Core Skills A, B, E, F]

3. Demonstrate a working knowledge of basic chemical concepts and methods [GE Goal 2, 3; Core Skills A, B, D, E, F]

4. Conduct literature searches and communicate findings orally and in writing [GE Goal 1, 3, 4; Core Skills A, B, D, E]

5. Perform chemical experimentation using proper scientific and laboratory safety procedures and maintaining an accurate and complete laboratory notebook [GE Goal 1, 2, 3; Core Skills A, B, D, E, F]

6. Construct slides and present the research project to faculty and students [GE Goal 1, 3, 4; Core Skills A, B, D, E]

Course-specific General Education Knowledge Goals and Core Skills.

General Education Knowledge Goals
Goal 1. Communication. Students will communicate effectively in both speech and writing.
Goal 2. Mathematics. Students will use appropriate mathematical and statistical concepts and operations to interpret data and to solve problems.
Goal 3. Science. Students will use the scientific method of inquiry, through the acquisition of scientific knowledge.
Goal 4. Technology. Students will use computer systems or other appropriate forms of technology to achieve educational and personal goals.

MCCC Core Skills
Goal A. Written and Oral Communication in English. Students will communicate effectively in speech and writing, and demonstrate proficiency in reading.
Goal B. Critical Thinking and Problem-solving. Students will use critical thinking and problem solving skills in analyzing information.
Goal D. Information Literacy. Students will recognize when information is needed and have the knowledge and skills to locate, evaluate, and effectively use information for college level work.
Goal E. Computer Literacy. Students will use computers to access, analyze or present information, solve problems, and communicate with others.
Goal F. Collaboration and Cooperation. Students will develop the interpersonal skills required for effective performance in group situations.
Evaluation of student learning:

- Research Advisor Evaluation: 33%
- *Mid-semester Project Review: 33%
- **Final Presentation: 33%

* Determination by MCCC Advisor
** Determined by both the MCCC Advisor & Research Advisor

See attached forms below

Cheating of any kind is not tolerated. This includes copying papers or website information or presenting another person's work as one's own, looking at a student's paper during a test or quiz, looking at notes during an exam or quiz, obtaining information about an exam, quiz, or any other information that other students do not have and the instructor does not intend them to have, and talking during an exam or quiz. Other academic integrity violations include giving answers to or writing papers for another student, submitting a paper which includes words or the creative work of another without acknowledging the source, presenting another individual's work as your own, and falsifying data or bibliographic entries. Any observed instance of cheating is punishable by confiscation of the work and being assigned a grade of zero. All violations of academic integrity will be reported to the Academic Integrity Committee. For more information, consult the Student Handbook.

RESEARCH ADVISOR

Name: _____________________________ Facility: _______________ e-mail address: __________

Student Responsibilities: Please read carefully.

1. You are required to devote a minimum of 6 hours/week of time in the research lab working on your project. Under no circumstances are you to work on unauthorized lab projects.
2. Specific days/time in the lab should be coordinated and agreed upon by you and the Research Advisor. In the event of an absence, it is your responsibility to notify the Research Advisor and make-up the missed scheduled time.
3. On a weekly basis, you are to contact the MCCC advisor either by e-mail or verbal communication, to keep them informed of your progress in the lab.
4. Between weeks 6 and 8 of the semester, the MCCC advisor will schedule a meeting at the facility so that you can review your research project. Scheduled meeting time will be ________________.
5. During the 15th week of the semester you will present your research project at MCCC to the Science faculty, invited science students, guests and Research Advisor. The presentation should be about 15 to 20 minutes in length and should include the use of overhead transparencies or Power Point. Your presentation must be reviewed by the MCCC advisor several days prior to the presentation. Presentation date tentatively will be ________________.
6. You are required to keep a Research Log Book of your research that is up-to-date, accurate and thorough.
7. Your grade will be calculated as follows:
   Research Advisor Evaluation: 33%
   *Mid-semester Project Review: 33%
   **Final Presentation: 33%

   *Determination by MCCC Advisor
   **Determined by both the MCCC Advisor & Research Advisor
