• Earth stores and saves and works silently and steadily to maintain diverse forms of life. It seeks balance and sustainability in all things. It is rich, fertile, vast, and full of resources.
• Earth is also generous, nourishing, supportive, ordered, and colorful. It has multiple textures and incredible depths. It can be towering and sheltering, dynamic and peaceful. It is slow to change, fertile, and full of treasures.

• Earth is aware of the "gravity" of every situation and operates on predictable laws. Earth knows that everything "matters". You can almost always count on earth to be there, no matter what.
