

Nursing 102 Study Guide for Exam 1

The exam will be given on June 19th at the start of class at 9:05 and will last for one hour, timed. It will end at 10:05 so please be on time. The exam is over at 10:05 regardless of when you start it. All bags will be placed at the front of the lecture hall on the stage and all cell phones will be in those bags. If I see anyone using their phone, the exam will be removed and you will get a zero for the test.

Because this is a summer class, there will be a lecture following the exam. It will begin at 10:10. Please return to class at that time. At the end of the class I will need a student to go with me to give the exams to Ms. Horner per MCCC policy.

There are 30 multiple choice questions. Some questions have more than one right answer and are duly noted. On these questions, you will be directed to select all the answers that apply.

You will need to know:

The differences between subjective and objective data

Pediatric and adult growth and developmental milestones

How to handle cultural differences
