

PIE NOTES

P: (FIND THE PROBLEM FROM THE LIST AT THE BEGINNING OF THE MULTIDISCIPLINARY NOTE SECTION OF THE CHART)

Alteration of comfort

I: INTERVENTION IS all the you see, hear, feel, read, do and that someone else has done for the client

This section usually starts with an assessment that you do with regard to collecting data about the problem

Eg: Assessed client for pain. Client indicated right lower abdominal pain rated 9/10 that is constant and stabbing and continuous. (LOCATION, INTENSITY, DURATION). Too early for pain medication. Called physician for change in medication orders. Physician ordered ii Percocet instead of i. Administered Percocet ii @ 1745. At 1815 client rated pain 3/10.

E: STATUS OF THE PROBLEM WHEN YOU WRITE THE NOTE

Eg: client is comfortable. Assess for pain q 4 hours. Provide comfort measures in between pain medication administration
