

## STUDY GUIDE EXAM 2

The exam will be given on July 5th at the start of class at 905 and will last for one hour, timed. It will end at 10:05 so please be on time. The exam is over at 10:05 regardless of when you start it. All bags will be placed at the front of the lecture hall on the stage and all cell phones will be in those bags. If I see anyone using their phone, the exam will be removed and you will get a zero for the test.

At the end of the class I will need a student to go with me to give the exams to Ms. Horner per MCCC policy.

There are 30 multiple choice questions. Some questions have more than one right answer and are duly noted. On these questions, you will be directed to select all the answers that apply.

You will need to know:

How to perform neurochecks.

Anatomical landmarks for taking vital signs

Know how to take vital signs, know the accepted ranges of vital signs, know which levels to be concerned about.

Know how to assess breath sounds and which ones are not within defined limits.

How to assess for brain trauma.
