

MERCER COUNTY COMMUNITY COLLEGE  
DIVISION OF SCIENCE AND HEALTH PROFESSIONS  
DEPARTMENT OF NURSING  
NURSING 202  
MEDICATION MATH REQUIREMENT

It is required that all Nursing 202 students acquire a mastery level of medication math competency demonstrated by earning 100% on the summary math test in order to complete the requirements of the course.

This mastery is achieved by reviewing topics outlined from the medication math textbook, Dosage Calculations 7<sup>th</sup> edition by Gloria Pickar.

A study outline of the topics to be covered on the summary math test is included with page numbers to study. If you feel uncomfortable with any aspect of the content tutoring is available during my office hours or by appointment.

During week 8 of the course the mastery test will be given during lab, a different test for each lab. Answers will be circulated at that time. If you do not earn 100% the first time, during the next lab you will be given questions specific to the areas of missed content. You can retake the content as many times as is necessary. Tutoring is required if you are unable to pass the test the second time around. This grade is not computed with your exam grade as this is a mastery requirement.

Every student in the program has achieved this goal with very little difficulty. Remember I am here to help you if you need help.
