Evaluation of student learning:

Instructional modes: Integrated lecture and laboratory, studio assignments with specifications and limitations set by the instructor, demonstrations by the instructor, and discussions and critiques of student work. The student is responsible for participating in classroom discussions and critiques of student work by including his or her work to that being discussed, and evaluated. In this way, the students learn the terms used in the field for which they are preparing. Diligent practice on assignments is essential to develop the skills required. Practice, in class lab and at home, will generally be visible in the work produced.

The student is responsible for his or her regular attendance, participation in classroom discussions and critiques of student work, and for including his or her work to be discussed and evaluated. Diligent work on assignments is essential.

Evaluation of progress and grades are determined by the instructor, and are based upon the following considerations: attendance, participation, and estimate of quality of class work and homework assignments (by instructor). The specific weight of each project shown in the grade breakdown chart in this section.

Values of quality, aesthetics, etc., based upon the instructor’s judgment of the work produced, the effort employed, and the total result achieved. To receive full credit, all assignments are due on time. A late assignment will be accepted one class period after due date with a reduced letter grade.

The grade of “A” will be earned by students who demonstrate mastery of the essential elements of the material presented, as well as demonstrating excellence in aesthetics and originality in completing course objectives with at least 90% accuracy.

The grade of “B” will be earned by students who demonstrate more than adequate mastery of the essential elements of the material presented and acceptable knowledge of the course content. Achievement will be demonstrated when all of the specific course objectives are fulfilled with at least 80% accuracy.

The grade of “C” will be earned by students who demonstrate adequate mastery of the essential elements of the material presented. Achievement will be demonstrated when all of the specific course objectives are fulfilled with at least 70% accuracy.

The grade of “D” is undesirable, but indicates a minimum passing of the course requirements. All of the course objectives must be fulfilled with at least 60% accuracy.

The grade of “F” will be earned by students who do not demonstrate achievement.

Critiques

Critiques are a vital part of learning design. There is much to be learned from reviewing the work of your colleagues: learn from their designs’ strengths and weaknesses. Critiques also provide the opportunity to put your concept into words, and to help you learn how to speak intelligently and knowledgeably about your designs. Additionally, the instructor and your classmates may bring fresh insights and perspectives to your work that provides valuable feedback.
