**Evaluation of student learning:**
Instructors have some discretion in determining the format and content of required work. However, written and verbal assignments in any history course are designed to help students develop the General Education skills (historical perspective, critical thinking, information literacy, writing, and public speaking) listed above. Instructors will emphasize these goals in their assignments and should state them in their written and verbal instructions to the students.

History courses will, therefore, utilize essay examinations, written reports and oral presentations as standard methods of assessing student learning. Below are the parameters within which instructors may operate:

**Reading Assignments**
- Textbook as well as primary documents will be clearly assigned to the students

**Exams & Quizzes**
- At least two (2), one-hour exams
- A final exam
- Exams should include at least a short essay component.

**Writing Assignments** (to assess discipline specific knowledge, communication skills, and critical thinking skills). Students are expected to develop the ability to construct narratives—written or verbal or both—that
clearly present their own thesis based on solid evidence that has been thoroughly and critically evaluated. Students are directed in developing competencies in accumulating evidence from a variety of sources, assessing the validity of the evidence, and extracting substantive generalizations from what they have discovered (Information Literacy).

A minimum of two (2), but preferable three (3), writing assignments:
- At least one (1) essay should concentrate on primary documents
- At least one (1) one assignment should incorporate library or internet research or both; this assignment may be a term paper or group presentation or some other type of project
- Length of the essays may be determined by the instructor; short (e.g., two-three page) essays are acceptable
- Writing assignments should all be designed to develop student learning outcomes in critical thinking, information literacy, and writing

**Academic Integrity Statement:**

Mercer County Community College is committed to Academic Integrity -- the honest, fair and continuing pursuit of knowledge, free from fraud or deception. This implies that students are expected to be responsible for their own work, and that faculty and Academic Student Resources staff members will take reasonable precautions to prevent the opportunity for academic dishonesty.
