Course Student Learning Outcomes (SLO):  
The student will be able to:
- Comprehend and define medical words/terms used in the medical profession. (ILG 3, PLO 3)  
- Categorize and divide medical words/terms into component parts to ascertain their meanings. (ILG 1,11, PLO 3,4)  
- Utilize the medical words/terms to build a solid foundation in terminology to succeed in a healthcare profession. (ILG 1,3 PLO 4)  
- Practice using a medical dictionary and other medical reference material in order to obtain definitions and pronunciations. (ILG 1,3 PLO 4)  
- Reinforce the study of anatomy with a review of the body systems and appropriate terminology. (ILG 3,11, PLO 4)  
- Recognize, spell correctly, define, and pronounce a wide variety of terms from all areas of medicine. (ILG 1, PLO 3)
Course-specific Institutional Learning Goals (ILG):

Institutional Learning Goal 1. Written and Oral Communication in English. Students will communicate effectively in both speech and writing.

Institutional Learning Goal 11. Critical Thinking: Students will use critical thinking skills understand, analyze, or apply information or solve problems.

Program Learning Outcomes for Exercise Science A.S. (PLO)

1. Succeed academically upon transfer to a baccalaureate program related to exercise science;
2. Secure employment in the field of exercise science;
3. Demonstrate the knowledge, skills, and ethical integrity necessary to succeed and grow as a health, wellness, fitness, and/or athletic performance professional;
4. Apply scientific and physiological principles to the promotion and enhancement of health, wellness, fitness, and athletic performance;
5. Assess and evaluate an individual’s health and performance;
6. Prescribe workouts for generally healthy individuals as well as for athletic populations and those with special considerations;
7. Conduct safe and effective training sessions with generally healthy individuals

Units of study in detail – Unit Student Learning Outcomes:

Unit 1

BASIC WORD STRUCTURE
Student will be able to:
- Learn objectives in studying the medical language
- Practice word analysis
- Apply practical applications to basic word structure
- Pronunciation of key medical terms

SLO 1,2,3,4

Unit 2

TERMS PERTAINING TO THE BODY AS A WHOLE
Student will be able to:
- Understand the structural organization of the body
- Identify abdominopelvic regions and quadrants
- Describe divisions of the back (spinal column)
- Understand positional and directional terms
- Describe the planes of the body
- Practical applications of terms pertaining to the body as a whole

SLO 1,2,3,4,6
Unit 3

**SUFFIXES/PREFIXES**
Student will be able to:
- Combine forms of suffixes and prefixes
- Pronounce suffixes
- Practical applications of suffixes and prefixes
- Explain suffix and prefix terminology

SLO 1,2,6

Unit 4

**DIGESTIVE SYSTEM**
- Student will be able to:
  - Understand the anatomy and physiology of the digestive system
  - Learn terminology of the digestive system
  - Describe pathology and pathological conditions of the digestive system
  - Pronounce terms pertaining to the digestive system

SLO 1,3,4,5,6

Unit 5

**URINARY SYSTEM**
- Understand the anatomy of the major organs
- Describe how the kidneys produce urine
- Urinalysis
- Understand terminology of structures and substances
- Describe Pathologic terminology - kidney, bladder, and associated conditions
- Pronounce urinary systems terms

SLO 1,2,6

Unit 6

**REPRODUCTION SYSTEMS**
- Classify organs of the female reproductive system
- Identify organs of the male reproductive system
- Describe the process of menstruation and pregnancy
- Discuss pathology as it relates to gynecologic, breast and neo-natal
- Identify clinical tests and procedures
- Discuss pathologic conditions relating to sexually transmitted infections
- Pronounce reproductive systems terms

SLO 1,2,3,5,6

Unit 7
RESPIRATORY SYSTEM
• Conceptualize the anatomy and physiology of respiration
• Identify respiratory terminology and vocabulary
• Name and describe pathological respiratory conditions
• Pronounce respiratory system terms
SLO 1,3,5

Unit 8

SKIN
• Understand the anatomy of the skin
• Describe the accessory structures of the skin
• Identify and understand terminology and vocabulary of the skin
• Name and describe various pathological skin conditions.
• Pronounce terms relating to the skin
SLO 1,3,5

Unit 9

NERVOUS SYSTEM
• Define the terms Neuron, Nerve, and Glial Cell
• Understand the physiology and functioning of the brain
• Conceptualize Spinal Cord and Meninges vocabulary and terminology
• Name and describe pathological conditions, laboratory tests & clinical procedures
• Pronounce terms relating to the nervous system
SLO 1,3,5

Unit 10

ENDOCRINE SYSTEM
• Define and describe the following terms: Thyroid gland, parathyroid glands, adrenal gland, pancreas, pituitary gland, ovaries, testes
• Name and describe pathological conditions, laboratory tests, and clinical procedures relating to the endocrine system
• Pronunciation of terms
SLO 1,3,6

Unit 11

CARDIOVASCULAR SYSTEM
• Describe blood vessels and the circulation of blood
• List and identify the anatomy of the heart
• Understand the physiology of the heart
• Understand the meaning and importance of blood pressure
• Identify and understand vocabulary and terminology pertaining to the cardiovascular system
• Name and describe pathological conditions, laboratory tests, and clinical procedures of the heart and blood vessels
• Pronounce terms of the cardiovascular system
SLO 1,3,6

Unit 12
Evaluation of student learning:
*Students in the Medical Assistant Program at the Health Careers Center must achieve a minimum grade of 75% in order to remain in the Medical Assistant Program.*
