The Americans with Disabilities Act of 1990 including changes made by the ADA Amendment Act of 2008 and Section 504 of the Rehabilitation Act of 1973 prohibits colleges and universities from making inquiries regarding a disability prior to admission. Information regarding a disability, voluntarily given or inadvertently received by Admissions will not affect a student's admission to Mercer County Community College. Acceptance into a specific College program, however, is contingent upon the student meeting the technical and academic standards of the program. (Updated Spring 2026)
