

MERCER COUNTY COMMUNITY COLLEGE
MATH, SCIENCE AND HEALTH PROFESSIONS DIVISION
COURSE OUTLINE

BIO 201 General Microbiology
Summer UA 2026

Course Coordinator: Professor D.N. Hilker
Hilkerd@mccc.edu 609-570-3367 Office: HS 113
Course Website: <http://www.mccc.edu/~hilkerd>

| | | |
|--------------------------|---------------------------|-----------------------------|
| <u>4</u> Credit Hours | <u>3</u> Lecture Hours | <u>3</u> Laboratory Hour |
|--------------------------|---------------------------|-----------------------------|

Required Texts/Laboratory Items:

1. Microbiology, by Tortora, et.al.
Pearson Co., 14th Edition, 2023
ISBN-13: 9780138200398
2. BIO201 General Microbiology Lecture Notes, by D.N. Hilker
MCCC Book Store, 5th Edition
3. Laboratory Experiments in General Microbiology, by D.N. Hilker
Stipes Publishing Co., 7th Edition. Only carried by MCCC Bookstore (6th edition is acceptable)
4. Print laboratory lecture notes before each lab. Notes can be found on the course website located at <http://www.mccc.edu/~hilkerd> **OR** can be purchased under Optional Texts.

Note: This class will be held in person at the West Windsor campus. It will NOT be offered online.

Optional Texts:

1. BIO201 General Microbiology Laboratory: Laboratory Experiment Lecture Notes, by Prof. Hilker (5/2019) or they can be printed from the website (refer to #4 above)

Catalog Description:

The study of the morphology, taxonomy and metabolism of microbes with emphasis on fungi, protozoa, helminths, viruses and bacteria. Review of role of microbes in nature and their industrial application and medical importance. The laboratory portion of the course stands alone and is essentially a complete and separate course by itself and will include mini-lectures.

Prerequisites: Successful completion of BIO 101 or BIO 103 (grade of C or better) or consent of instructor

Note: Participation in Biology laboratory courses is permitted provided the student has completed the required prerequisites, is a minimum of 16 years of age or by permission of the instructor and the division Dean.

- Laboratory: Sum of 10 best lab quizzes = 80 pts. x 0.90 = 72 pts.
 Correct unknown identified = 10 pts.
- $\frac{400 \text{ pts.} \times .70}{5} = 56 \text{ pts.}$
 - 96 pts. x 0.05 = 4.8 pts.
 - (72 pts. + 10 pts.) x .25 = 20.5 pts.
- Total = 81.3 pts. = B⁻

Course Grading:

A = 93-100 A⁻ = 90-92 B⁺ = 87-89 B = 83-86 B⁻ = 80-82
 C⁺ = 77-79 C = 70-76 D = 60-69 F = 0-59

Microbiology Laboratory: The laboratory involves students working with microorganisms using proper safety precautions. Students should assume that these microbes have the potential to cause disease if they are not handled properly or if the student is immunocompromised. If you have a predisposing medical condition, please consult with your physician about taking this class. A list of microbes used in the laboratory can be provided upon request.

Lecture Attendance: Students are expected to attend class unless are they are ill or have an excused reason for not attending. If you are unable to attend, please inform the instructor of your absence. An attendance sheet will be circulated in lecture. **Please indicate you are present.**

Voice-overs of the lectures from 2020 (13th ed. of the Textbook) are found in Blackboard and are NOT meant to replace attending the lecture but to reinforce the material covered in the classroom. Topics may be discussed in-class that are NOT on the Voice-over since the PPT notes have been updated using the 14th edition of the Textbook. Excessive (30% or more) lecture absences may result in a lower course grade by the instructor.

Mercer's Academic Integrity Policy

Any student who: a) knowingly represents work of others as his/her own; b) uses or obtains unauthorized assistance in the execution of any academic work; or c) gives fraudulent assistance to another student is guilty of cheating. **Violators will be penalized in accordance with established college policies and procedures and be given a zero grade for that assignment.**

Your examination should reflect your work and knowledge alone. You may not use **any** outside help, written or oral. You may not use notes of any sort; nor exchange papers, comments or gestures with classmates. Such an exchange of information constitutes cheating. You are just as guilty of cheating **giving** information to a person as is the person **receiving** it. If cheating is observed, the exam/quiz will be taken by the instructor and a grade of a zero will be given. This applies equally to the giver & receiver of information. Cheating may result in a student being removed from the course and/or being reported to the Academic Integrity Committee. Be careful not to give the **appearance** of cheating. Keep your eyes to yourself. Keep your papers in front of you flat on the desk. Smart watches, ear buds and phones are to be put away and not in a pocket.

Instructors reserve the right to conduct an additional evaluation (e.g., oral/written exam) if any particular test score is dramatically inconsistent with other exam results or classroom performance. The goal is to make an accurate & fair assessment of a student's performance in the course.

Course Student Learning Objectives (SLO):

Upon satisfactory completion of this course, students should be able to:

1. Highlight the historical events associated with the field of microbiology and immunology. (Supports IGL 1, 3, 4, 7, 10; PLO 3)
2. Distinguish between prokaryotic and eukaryotic cells and understand the evolutionary relatedness of organisms. (Supports IGL 1, 3, 4, 7, 10, 11; PLO 1, 2, 3)
3. Develop a thorough understanding of the molecular structure, growth requirements and metabolic processes of various microorganisms. (Supports IGL 1, 2, 3, 4, 10, 11; PLO 1, 2, 3, 4)
4. Describe the impact of microbes in nature and society, the role of microbes in an ecosystem and human impact on the evolution of microorganisms. (Supports IGL 1, 2, 3, 4, 7, 9, 10, 11; PLO 1, 2, 3, 4)
5. Analyze the various immunological methods that hosts utilize to defend themselves from microorganisms and how these organisms can impact human homeostasis. (Supports IGL 1, 3, 4, 10, 11; PLO 1, 2, 3, 4)
6. Describe the methods available in controlling, preventing and treating infectious disease. (Supports IGL 1, 2, 3, 4, 10, 11; PLO 1, 2, 3, 4)
7. Develop microbiological laboratory skills in applying the scientific method of inquiry to gather and use information for the purposes of critical thinking, information analysis and problem solving in a microbiology laboratory. (Supports IGL 1, 2, 3, 4, 10, 11; PLO 1, 2, 4, 5)

Biology Program Learning Objectives (PLO):

PLO 1: Demonstrate understanding of the fundamental principles, concepts, and terminology of biology.

PLO 2: Explain structures and fundamental processes of life at molecular, cellular, and organismal levels.

PLO 3: View the living world with greater understanding, insight, and appreciation as it relates to the field of biology and contemporary problems and issues.

PLO 4: Demonstrate the ability to apply the scientific method of inquiry to gather and use information for the purposes of critical thinking, information analysis, and problem solving.

PLO 5: Exhibit proficiency in the laboratory and in the field by using standard equipment and measurement and observation techniques that allow one to gather, analyze, and interpret qualitative data.

Course Specific Institutional Goals (ILG):

ILG 1. Written and Oral Communication in English. Students will communicate effectively in both speech and writing.

ILG 2. Mathematics. Students will use appropriate mathematical and statistical concepts and operations to interpret data and to solve problems.

IGL 3. Science. Students will use the scientific method of inquiry, through the acquisition of scientific knowledge.

IGL 4. Technology. Students will use computer systems or other appropriate forms of technology to achieve educational and personal goals.

IGL 7. History. Students will understand historical events and movements in World, Western, non-Western, or American societies and assess their subsequent significance.

IGL 9. Ethical Reasoning and Action. Students will understand ethical frameworks, issues, and situations.

IGL 10. Information Literacy: Students will recognize when information is needed and have the knowledge and skills to locate, evaluate, and effectively use information for college level work.

IGL 11. Critical Thinking: Students will use critical thinking skills understand, analyze, or apply information or solve problems.

Units of study in detail

Unit 1: Introduction to Microbiology [Supports SLO #1 ,2, 3, 4, 5, 6]

Learning Objectives

The student will be able to...

- Explain the benefits of microorganisms to the environment and society
- Identify individuals who have contributed to the field of microbiology and immunology
- Classify living organisms based on their molecular and cellular characteristics
- Explore the various methods used to observe bacteria microscopically

Unit 2: Mycology [Supports SLO #2, 3, 4, 5, 6]

Learning Objectives

The student will be able to...

- Characterize the organisms that make up the Fungi Kingdom and discuss their benefits to society
- Compare and contrast fungi to other types of microbes
- Understand the structural composition and growth requirements of yeast and molds
- Understand the effects of mycoses on the human body

Unit 3: Animal Parasites [Supports SLO #2, 3, 4, 5 6]

Learning Objectives

The student will be able to...

- Understand the characteristics of protozoa and their interactions with arthropod vectors
- Compare and contrast protozoa and helminths to other types of microbes
- Explain the features of parasitic helminths
- Understand the effects of protozoa and helminthic infections on the human body

Unit 4: Bacterial Structure and Physiology[Supports SLO #2, 3, 4, 6]

Learning Objectives

The student will be able to...

- Compare and contrast eukaryotic and prokaryotic cells
- Describe the morphological appearance of bacteria
- Explain the physical and chemical growth requirements of bacteria
- Demonstrate knowledge of binary fission and bacterial growth phases
- Compare and contrast methods by which bacteria can exchange genetic information

Unit 5: Virology [Supports SLO #1, 3, 4, 5,6]

Learning Objectives

The student will be able to...

- Explain the characteristics and requirements of viruses
- Compare and contrast bacteriophages with animal viruses
- Classify animal viruses based on their nucleic acid
- Describe prions and compare them to other organisms
- Explain the relationship between viruses and cancer

Unit 6: Bacterial Groups [Supports SLO #2, 3, 4, 6]

Learning Objectives

The student will be able to...

- Explain how bacteria are grouped based on their metabolic processes, biochemical characteristics and structural and morphological appearances

- Understand the benefits and detrimental effects of bacteria to the environment and society
- Explain their importance in various ecosystem

Unit 7: Applied Microbiology [Supports SLO #2, 3, 4, 5]

Learning Objectives

The student will be able to...

- Explore food preservation methods in preventing microbial spoilage
- Describe the use of microbes in the food industry and their industrial uses
- Examine the use of microbes in energy production
- Explain the role of microbes in genetic engineering and give examples of their applications in the medical and agricultural fields

Unit 8: Infection and Disease-An Introduction to Microbial Pathogenesis [Supports SLO #4, 5, 6]

Learning Objectives

The student will be able to...

- Understand the terms that are used to describe the types, occurrences and duration of infectious disease
- Investigate the methods infectious diseases are spread and their host-parasite relationships
- Describe a microbe's physiological features and metabolic reactions, including exoenzymes and toxins, that enables them to alter their pathogenicity

Unit 9: Resistance to Infection-Cellular Defenses [Supports SLO #4, 5, 6]

Learning Objectives

The student will be able to...

- Describe a host's first line of defense when combating an infection including both non-aggressive and aggressive measures
- Describe a host's second line of defense and differentiate between the various types of phagocytic cells
- Analyze the steps of an inflammatory response when combating an infection and the roll of various proteins and cells in the body

Unit 10: Immunology-Antibodies and Humoral Defense [Supports SLO #4, 5, 6]

Learning Objectives

The student will be able to...

- Compare and contrast cellular and humoral defenses
- Understand the difference between antigens and antibodies
- Characterize the five types of immunoglobulins and explain their molecular structure
- Analyze T and B lymphocytes and explain their role in immunological development
- Understand immunological disorders and the role of antibodies in tissue transplants and hypersensitivity reactions

Unit 11: Methods of Microbial Control-Preventing and Controlling Microbial Infections

Learning Objectives [Supports SLO #4, 5, 6]

The student will be able to...

- Understand the various physical and chemical methods of microbial control
- Differentiate between antiseptics vs. disinfectants
- Explain the general principles of microbial chemotherapy and historical events surrounding antibiotic discoveries

- Describe the various mechanisms of action that anti-bacterial antibiotics exert on bacteria and the side effects of antibiotics
- Understand the general mechanisms of action that anti-fungal, anti-protozoan, anti-helminthic and anti-viral drugs exert on microbes
- Describe how drug resistance occurs and the dangers of antibiotic abuse globally

Unit 12: Microbial Diseases of the Skin, Eyes & Respiratory Tract [Supports SLO # 3, 4, 5, 6]

Learning Objectives

The student will be able to...

- Understand the anatomy and the normal flora of the skin, eyes and upper/lower respiratory tract
- Describe the various bacterial, viral, fungal, and protozoan diseases of these areas and the methods used to treat and identify them

Unit 13: Microbial Diseases of the Digestive System [Supports SLO # 3, 4, 5, 6]

Learning Objectives

The student will be able to...

- Understand the anatomy and normal flora of the digestive system
- Differentiate between an intoxication and infection
- Describe the various bacterial, viral, fungal, protozoan and helminthic diseases of this area and the methods used to treat and identify them

Unit 14: Microbial Diseases of the Urinary & Reproductive Systems [Supports SLO #3, 4, 5, 6]

Learning Objectives

The student will be able to...

- Understand the anatomy and normal flora of the urinary and reproductive systems
- Describe the various bacterial, viral, fungal, and protozoan diseases associated with the urinary and reproductive systems and the methods used to treat and identify them
- Describe other sexually transmitted diseases including AIDS

Unit 15: Microbial Diseases of the Nervous & Cardiovascular Systems [Supports SLO # 3, 4, 5, 6]

Learning Objectives

The student will be able to...

- Understand the anatomy of the nervous and cardiovascular systems
- Describe the various bacterial, viral, fungal, protozoan and helminthic diseases associated with these systems and the methods used to treat and identify them

Laboratory Component: [Supports SLO # 3, 6] The laboratory exercises permit an understanding of techniques, reinforce certain lecture material and introduce concepts and material not presented in lecture.

Learning Objectives

The student will be able to...

- Conduct experiments independently as well as with others in the laboratory
- Master the necessary microbiological laboratory skills when applying the scientific method of inquiry
- Use critical thinking skills when gathering and analyzing information and problem solving in a microbiology laboratory
- Identify an unknown microorganism and present their findings orally and written

Summer UA 2026
BIO201 Lecture Schedule

Note: Dates of Class Assignments/Exams will be announced in class and are found in the course calendar located in Blackboard. Schedule is subject to change at the discretion of the instructor.

| <u>Unit #</u> | <u>Day :</u> | <u>Chapter(s)</u> | <u>Subject</u> |
|---------------|--------------|------------------------|---|
| 1 | 5/15 | 1, 3, 10, 14 | Introduction to Microbiology <i>Class Assignment #1: Unit 1</i> |
| 2 | 5/18 | 12, 21,22,24-26 | Mycology <i>Class Assignment #2: Unit 2</i> |
| 3 | 5/18 & 20 | 12, 22-26 | Animal Parasites: Protozoa & Helminths <i>Class Assignment #3: Unit 3</i> |
| 4 | 5/22*& 5/27 | 2, 4, 5, 6, 8 | Bacterial Physiology, Structure, & Genetics <i>Class Assignment #4: Unit 4</i> EXAM 1-Units 1, 2, 3: 5/22/26 |
| 5 | 5/27 & 5/29 | 13, 21-26 | Virology <i>Class Assignment #5: Unit 5</i> |
| 6 | 5/29 & 6/1 | 11 & 27; Appendix E | Bacterial Groups <i>Class Assignment #6: Unit 6</i> |
| 7 | 6/1 & 6/3 | 9 & 28 | Applied Microbiology & Biotechnology <i>No Class Assignment</i> EXAM 2-Units 4, 5, 6: 6/3/26 |
| 8 | 6/3 & 6/5 | 14, 15 | Infection & Disease <i>No Class Assignment</i> |
| 9 | 6/5 | 6 | Cellular Defenses: 1 st & 2 nd Lines of Defense <i>No Class Assignment</i> |
| 10 | 6/5 & 6/8 | 17, 18, 19 | Immunity: Humoral Defenses (3 rd Line of Defense) Hypersensitivity & Serology <i>Class Assignment #7: Unit 10 (I, II, III)</i> EXAM 3-Units 7,8,9,10 (I, II, III): 6/8/26 |
| 11 | 6/8 & 6/10 | 7, 20 | Control of Microbes <i>No Class Assignment</i> |
| 12 | 6/10 | 21, 24 | Diseases of the Skin, Eyes & Respiratory System <i>Class Assignment 8: Units 11 and 12</i> |

***Memorial Day Recess: 5/25/26-College Closed**

| <u>Unit #</u> | <u>Day:</u> | <u>Chapter(s)</u> | <u>Subject</u> |
|---------------|---------------|-------------------|---|
| 13 | 6/12* | 25 | Diseases of the Digestive System EXAM 4-Units 10 (IV on), 11, 12: 6/12/26 |
| 14 | 6/12 & 6/15 | 26 | Diseases of the Urinary/Reproductive Systems Class Assignment 9: Units 13 and 14 |
| 15 | 6/15 & 6/17** | 22, 23 | Diseases of the Nervous & Cardiovascular Systems Class Assignment 10: Unit 15 Exam 5-Units 1-15 (Cumulative-100 Ques.) 6/22/26 In-Class-2 hours |

***Withdrawal Deadline: 6/12/26**

****Juneteenth Day: 6/19/26-College Closed**

Mastering Microbiology Website: Optional

The textbook publisher has a comprehensive tutorial and review tool that provides students with a wide variety of activities for every chapter in the textbook. These activities are **not required** for the course. The access code for this site is included with the new edition of the text. If it's not included or if you have an older version of the text and would like to purchase access to the site go to <http://www.masteringmicrobiology.com/>.

Microbiology Resources:

The following websites might be of interest to you: www.sciencenews.org , www.sciencedaily.com www.cdc.gov (Centers for Disease Control), and www.asm.org (American Society of Microbiology; podcasts available)

Lecture Exam Dates: Tentative Dates (subject to change by the instructor)

Exams 1-4 (50 Ques.) will be **given in class (60 minute limit)**. Exam 5 (100 Ques.) will be given in class on 6/22/26 with a 2-hour time limit. Refer to the course website

<http://www.mccc.edu/~hilkerd> for Exam 5 times for each lecture section

| | |
|----------------|--|
| Exam #1 | Units 1,2,3-Fri. 5/22/26 |
| Exam #2 | Units 4,5,6-Wed. 6/3/26 |
| Exam #3 | Units 7,8,9,10 (I, II, III)-Mon. 6/8/26 |
| Exam #4 | Units 10 (IV on),11,12-Fri. 6/12/26 |
| Exam #5 | Units 1-15 (50 Ques. Units 13,14,15 & 50 Ques. Units 1-12)-Mon. 6/22/26 |

Accessibility Statement

Mercer County Community College recognizes disability as an aspect of diversity. This class has been designed to meet the diverse needs of all learners. Please schedule an appointment with me to discuss your unique learning needs.

If you have, or believe you have, a disability and feel that you will require academic accommodations, please contact the Center for Accessibility Resources (CAR) office. Contact information can be found on the [Center for Accessibility Resources \(CAR\)](#) webpage, which provides comprehensive step-by-step information regarding accessibility and reasonable academic accommodations.

Financial Aid Statement

It is recommended that students complete an application for financial aid to determine eligibility for financial assistance. The application is **FREE**; visit studentaid.gov to complete your application. There are deadlines for application submissions. FAFSA deadline information can be found at [FAFSA application Deadlines](#). Students interested in MCCC Foundation scholarships are also expected to complete an application. Information can be found on the [MCCC Foundation](#) webpage.

Diversity, Equity, and Inclusion Statements

Inclusivity Statement: Mercer County Community College's (MCCC) students, faculty, and staff are diverse. MCCC strives to be inclusive and equitable, which is critical to our educational mission. MCCC seeks to embrace differences, adapt to change, and contribute to the community. MCCC aims to create supportive and inclusive learning environments in which individual differences are understood, respected, appreciated, and recognized as a source of strength. If aspects of the design, instruction, and experiences within a course hinder your inclusion, please notify the instructor as soon as possible.

Religious/Cultural Observance: Cultural and religious holidays are significant to many people. Persons with religious or cultural observances that coincide with this class should let the instructor know in writing of any rescheduling consideration needs by the deadline provided by the instructor or, if no deadline is provided, at least two weeks prior to the observance.

Summer UA 2026
BIO 201 LABORATORY SCHEDULE

Disposable gloves MUST be brought to ALL labs. Closed-toed shoes are highly recommended.

| <u>Day:</u> | <u>Laboratory</u> | <u>Experiments</u> | <u>Topics</u> |
|--------------------|--------------------------|---------------------------|---|
| 5/15 | 1 | 1, 2, 3 | Introduction to Light Microscopes Survey of Microbes Collecting Microbes |
| 5/18 | 2 | 3 | Mold Identification Isolation Techniques |
| 5/20 | 3 | 4 | Staining Techniques |
| 5/22 | 4 | 5 6 | Culture Media Pour Plate Techniques |
| 5/27* | 5 | 7 8 | Temp. vs. Growth Temp. vs. Survival |
| 5/29 | 6 | 9 10 11 12 | pH Osmotic Pressure Ultraviolet Light Anaerobic Techniques |
| 6/1 | 7 | 23 24 25 | Transformation Latex Agglutination Parasitology |
| 6/3 | 8 | 13 14 17 18 | Antimicrobial Agents Antibiotics Skin Microbes Throat Cultures |
| 6/5 | 9 | 17-18 19 20 | ID Skin & Throat Microbes Water Analysis for Contamination Water Microbes |
| 6/8 | 10 | 15 | Biochemical Reactions |

***Memorial Day Recess-5/25/26-College Closed**

| <u>Day:</u> | <u>Laboratory</u> | <u>Experiments</u> | <u>Topics</u> |
