

Due: \_\_\_\_\_

**IST 101** – Computer Concepts

Name: \_\_\_\_\_

Research topic#: \_\_\_\_\_

Instructor: \_\_\_\_\_

Semester: \_\_\_\_\_

**Homework 2 - Information Literacy (outline and references)**

This assignment requires you to read all the articles you have researched for your selected topic. As you read your articles, look for facts, points, or ideas that you did not know about this topic prior to the research. Specifically, identify 3 details about your topic from your researched articles.

1. Create outline for the paper.
  - After reading your reference articles, prepare an outline for the final paper. The outline should **not be in essay format** but in outline format. It should include your thesis, 3 supporting details / points, and a summary. **The outline should be no longer than one page.**
2. Create references page using APA format.
  - Using the 3 references you found from your web research (Homework 1) and the 2 references you found from your library database research (Lab 7), prepare a references page with 5 entries in APA format. The references page should have 5 references in total and should be in alphabetical order with hanging indents.

**Grading Rubric:**

	Points
Paper outline 5 – demonstrates understanding of the topic, clear direction for the paper, is 1 page, and is in outline format 4 – demonstrates understanding of the topic but is not in outline format or is over 1 page 3 – does not demonstrate understanding of the topic, nor clear direction for the paper but is in outline format 2 – does not demonstrate understanding of the topic, nor clear direction for the paper and is not in outline format 0 – Outline not attempted.	
References page 5 – 5 references, APA format. 4 – 5 references, not in APA format. 3 – less than 5 references, all in APA format. 2 – less than 5 references, not in APA format. 0 – No attempt at bibliography.
