

**1. VIEW - DISSECTION / TOPIC - HEAD AND NECK**

What is the "kissing" muscle?

**2. VIEW - DISSECTION / TOPIC - HEAD AND NECK**

The action of what muscle can be used to show expression of "horror"?

**3. VIEW - DISSECTION / TOPIC - HEAD AND NECK**

Name the muscle responsible for elevation of the scapula, such as shrugging the shoulders.

**4. VIEW - DISSECTION / TOPIC - HEAD AND NECK**

Name the muscle that when contracted, the head rotates so that the face turns downwards to the opposite side.

**5. VIEW - DISSECTION / TOPIC - THORAX**

What muscle is involved in adduction, extension, and medial rotation of the arm?

**6. VIEW - DISSECTION / TOPIC - THORAX**

Name the muscle that consists of three to four bellies separated by tendinous intersections?

**7. VIEW - DISSECTION / TOPIC - THORAX**

Name the muscle with its origin at the medial clavicle and the manubrium of the sternum and its insertion at the mastoid process.

**8. VIEW - DISSECTION / TOPIC - THORAX**

What muscle is referred to as the "pecs"?

**9. VIEW - DISSECTION / TOPIC - ABDOMEN**

What abdominal muscle has its fibers running at right angles to the internal oblique?

**10. VIEW - DISSECTION / TOPIC - BACK**

Name the superficial “kite-shaped” muscle of the back that spans from the occipital bone to vertebrae T12.

**11. VIEW - DISSECTION / TOPIC - BACK**

Name the superficial muscle whose origin is the spinous process of T2 - T5 vertebrae?

**12. VIEW - DISSECTION / TOPIC – SHOULDER AND ARM**

What specific structure of what bone constitutes the point of the elbow, where the triceps brachii muscle inserts.

**13. VIEW - DISSECTION / TOPIC – SHOULDER AND ARM**

Name the 2 headed muscle that allows flexion of the forearm.

**14. VIEW - DISSECTION / TOPIC – SHOULDER AND ARM**

Name the muscle found in the infraspinous fossa.

**15. VIEW - DISSECTION / TOPIC – SHOULDER AND ARM**

Name the 4 rotator cuff muscles, what is their function?

**16. VIEW - DISSECTION / TOPIC – SHOULDER AND ARM**

Name two muscles with their insertions on the medial border of the scapula

**17. VIEW - DISSECTION / TOPIC – HIP AND THIGH**

Name the muscle Important in assuming "scissor-legged" or "cross-legged" position.

**18. VIEW - DISSECTION / TOPIC – HIP AND THIGH**

Name the two muscles that allow the non-weight-bearing limb to swing during walking.

**19. VIEW - DISSECTION / TOPIC – HIP AND THIGH**

Name the calf muscle deep to the gastrocnemius.

**20. VIEW - DISSECTION / TOPIC – HIP AND THIGH**

Name the powerful muscle for “push-off” of the foot during walking or running.
