

How to use the Media Search Feature in SoftChalk

You may wish to enhance your SoftChalk by including videos within your SoftChalk presentation. This document will provide instructions on how to accomplish this.

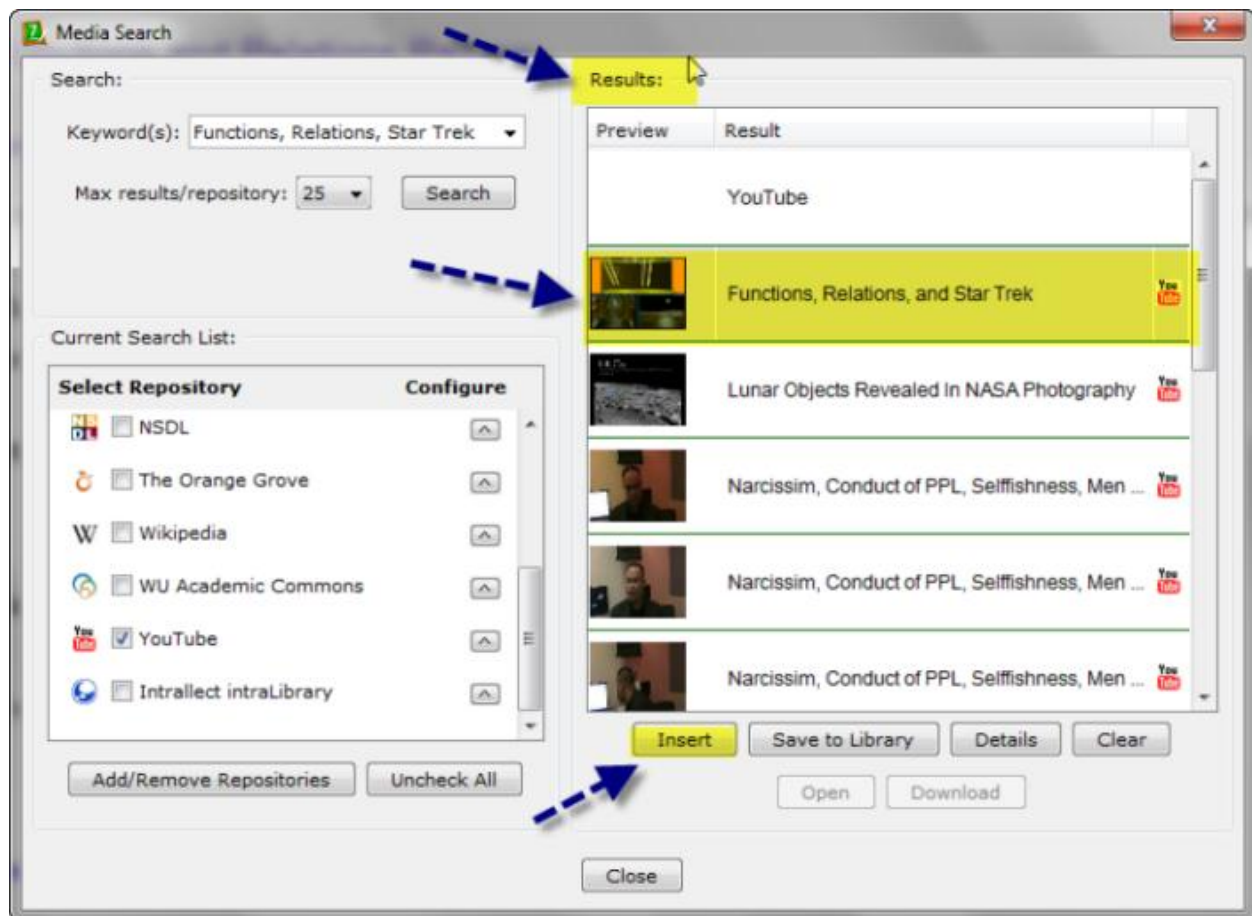

1. Open your document in SoftChalk (File > Open > browse for file; make sure the index.html file is the file opened in SoftChalk).
2. Position your cursor where you would like to add your video.
3. Click on the “Tools” to obtain the drop down menu. Then click on “Media Search”.

4. To the right of “Keywords:”, add your search keywords to find your video. Also, select the library where SoftChalk should search for the video. This example is searching through YouTube. Then, finally, click “Search”.

- On the right hand side, you will see the results of your YouTube search based on your Keywords. Scroll to find the video you would like to include in your SoftChalk. Click on the video name under "Results" (to choose it) and click on "Insert".

6. Finally, the video is added to the SoftChalk. The “Widget” is the placeholder for the video.

7. To test the SoftChalk, first click “File” on toolbar, then click “Save”. Finally, click “Preview”, then “View in Browser”. You will see your video (click  to Play video)

"Beam me up Scotty"
